The Mediterranean and the Mediterranean World in the Age of Philip II Fernand Braudel, 2023-07-25 The focus of Fernand Braudel's great work is the Mediterranean world in the second half of the sixteenth century but Braudel ranges back in history to the world of Odysseus and forward to our time moving out from the Mediterranean area to the New World and other destinations of Mediterranean traders Braudel's scope embraces the natural world and material life economics demography politics and diplomacy *The Principles of Representative Government* Bernard Manin, 1997-02-28 The thesis of this original and provocative book is that representative government should be understood as a combination of democratic and undemocratic aristocratic elements Professor Manin challenges the conventional view that representative democracy is no more than an indirect form of government by the people in which citizens elect representatives only because they cannot assemble and govern in person The argument is developed by examining the historical moments when the present institutional arrangements were chosen from among the then available alternatives Professor Manin reminds us that while today representative institutions and democracy appear as virtually indistinguishable when representative government was first established in Europe and America it was designed in opposition to democracy proper Drawing on the procedures used in earlier republican systems from classical Athens to Renaissance Florence in order to highlight the alternatives that were forsaken Manin brings to the fore the generally overlooked results of representative mechanisms These include the elitist aspect of elections and the non binding character of campaign promises *The Architect and Contract Reporter*, 1902

Political Economies of Empire in the Early Modern Mediterranean Maria Fusaro, 2015-05-05 Against the backdrop of England's emergence as a major economic power the development of early modern capitalism in general and the transformation of the Mediterranean Maria Fusaro presents a new perspective on the onset of Venetian decline Examining the significant commercial relationship between these two European empires during the period 1450-1700 Fusaro demonstrates how Venice's social political and economic circumstances shaped the English mercantile community in unique ways By focusing on the commercial interaction between Venice and England she also re-establishes the analysis of the

maritime political economy as an essential constituent of the Venetian state political economy This challenging interpretation of some classic issues of early modern history will be of profound interest to economic social and legal historians and provides a stimulating addition to current debates in imperial history especially on the economic relationship between different empires and the socio economic interaction between rulers and ruled **The Negotiations ... in His Embassy to the Ottoman Porte from the Year. 1621-28 Inclusive.
