Decolonising Indigenous Child Welfare Terri Libesman,2013-12-04 During the past decade a remarkable transference of responsibility to Indigenous children s organisation has taken place in many parts of Australia Canada the USA and New Zealand It has been influenced by Indigenous peoples human rights advocacy at national and international levels by claims to self determination and by the globalisation of Indigenous children s organisations Thus far this reform has taken place with little attention from academic and non Indigenous communities now *Decolonising Indigenous Child Welfare Comparative Perspectives* considers these developments and evaluating law reform with respect to Indigenous child welfare asks whether the pluralisation of responses to their welfare and well being within a cross cultural post colonial context can improve the lives of Indigenous children The legislative frameworks for the delivery of child welfare services to Indigenous children are assessed in terms of the degree of self determination which they afford Indigenous communities The book draws upon interdisciplinary research and the author s experience collaborating with the peak Australian Indigenous children s organisation for over a decade to provide a thorough examination of this international issue Dr Terri Libesman is a Senior Lecturer in the Law Faculty at the University of Technology Sydney She has collaborated researched and published for over a decade with the peak Australian Indigenous children s organisation

Inside the Child's Head Jennifer Laurence,2019-02-11 *Inside the Child s Head* traces the emergence of biomedical diagnoses of behavior disorders in children It provides a new critical counterpoint to the kind of myth or reality debate on childhood disorders Social policy debates about ADHD for example inasmuch as they are conducted around essentialist dichotomies of the biological and the social lead into a philosophical cul de sac The authors suggest that understanding and acting upon childhood disorders lie not so much in elucidating grand philosophical and etiological

questions or in pinning our hopes on new scientific discovery of what is going on in the child's head as in the historical possibilities of the present day make up of this inside The book provides an account of the historical contexts in which the biomedical and social bases for disorders have been formulated showing that both sets of understandings draw on common phenomena and use similar instruments to reach their conclusions Outlined are a series of formative locations whence particular and localized governmental problems to do with managing discrete populations rub up against fairly inauspicious technical solutions focused on pivotal events in specific institutional and social spaces These include changes to the spatial organization of classroom changes in the science of policing social space the war time development and extended clinical deployment of the electroencephalograph the hand in hand emergence of computer and cognitive science and the effects of the computer itself on the way we conceptualize brain space The book treats the appearance of the child with behavior disorder as an achievement of various agencies of science and government rather than an initial encounter for discovering scientific truths
