Introduction

The Sylvania ECG semiconductor product line is designed to minimize replacement parts inventory for the electronic technician and yet economically meet replacement needs of the wide variety of equipment which he encounters. Selective additions are made to the ECG line from time to time to keep abreast of the many new types as they find their way into the field.

This master replacement guide provides replacement considerations and specifications for ECG products as well as a replacement directory

which cross references JEDEC and manufacturers' part numbers to the Sylvania ECG types which will replace them. Periodic supplements are published to reflect the many new semiconductor devices constantly being placed into service by equipment manufacturers.

The technical data given on the following pages are intended to show safe areas of ECG device operation and level of performance. They are not to be considered limits for new equipment designs. GTE Sylvania Incorporated cannot guarantee that

the listed items provide an exact replacement in all applications.
