MCMAP is a combat system developed by the United States Marine Corps to combine existing and new hand to hand and close quarters combat CQC techniques with morale and team building functions and instruction in the Warrior Ethos The program which began in 2001 trains Marines and U S Navy personnel attached to Marine units in unarmed combat edged weapons weapons of opportunity and rifle and bayonet techniques It also stresses mental and character development including the responsible use of force leadership and teamwork The techniques used by MCMAP vary in degrees of lethality allowing the user to select the most appropriate usually the least amount of force For example a Marine facing a nonviolent but noncompliant subject can use an unarmed restraint to force compliance with minimal damage and pain A more aggressive subject could be met with a choke hold or a strike Lethal force can be used on a subject as a last resort The majority of techniques can be defensive or offensive in use with or without a weapon allowing Marines flexibility in combat and operations other than war such as civil control or humanitarian missions as well as self defense

Martial Arts in the Modern World Thomas A. Green, Joseph R. Svinth, 2003-11-30 Martial arts once restricted to a few specific locations and practiced by small groups of devotees have truly spread throughout the world The plethora of tae kwondo and karate dojos in U S shopping malls attests to the popularity of various kinds of martial arts in this country Though generally perceived and advertised as means of self defense body sculpting and self discipline martial arts are actually social tools that respond to altered physical social and psychological environments This book examines how practitioners have responded to stimuli such as feminism globalism imperialism militarism nationalism slavery and the commercialization of sport In a series of chapters devoted to Asian African and European systems of the late 19th to early 21st centuries the authors examine the forces and philosophies that shaped fighting arts in diverse cultural settings Because of political social and economic factors this period witnessed the spread of martial arts to areas outside of their original contexts Some of these arts flourished in their new environments but others did not The authors demonstrate that martial arts are not the conservative strongholds of tradition posited by conventional wisdom but are instead responsive and mutable barometers of change This book is essential for students of multicultural dialogues and devotees of martial arts performance and practice

21st Century U.S. Military Manuals Department of Defense, U. S. Military, U. S. Marine Corps, 2017-09-26 This publication is about winning in combat Winning requires many things excellence in techniques an appreciation of the enemy exemplary leadership battlefield judgment and focused combat power Yet these factors by themselves do not ensure success in battle Many armies both winners and losers have possessed many or all of these attributes When we examine closely the differences between victor and vanquished we draw one conclusion Success went to the armies whose leaders senior and junior could best focus their efforts their skills and their resources toward a decisive end Their success arose not merely from excellence in techniques procedures and material but from their leaders abilities to uniquely and effectively combine them Winning in combat depends upon tactical leaders who can think creatively and act decisively This book pertains equally to all Marine leaders whether their duties entail combat service support combat support or combat arms It applies to the Marine air ground task force commander as well as the squadron commander and the fire team leader All Marines face tactical decisions in battle regardless of their roles Tactical leaders must develop and hone their warfighting skills through study and practice This publication serves as a guide for that professional development It addresses the theory

of tactics and its application in a chaotic and uncertain environment The concepts and ideas within this publication are battle tested Throughout our history one of the most important reasons for the success of the United States Marine Corps has been the military skill of our leaders at every level of command Through their tactical skill and battlefield judgment our commanders achieved tactical and operational advantage at the decisive time and place
