Symphony David Cope, 2014-07-26 I completed the first draft of my fifth symphony sometime in 1968 in Pittsburg Kansas Martin Luther King Jr was assassinated in April of that year and his passing no doubt made a great impression on me and this work though that impression was intuitive rather than programmatic As with all fifth symphonies composers tend to pay special heed given it s importance in music history Beethoven Shostakovich Mahler Sibelius and so on The final version of the work heard here received its final revision in 2007 some thirty nine years after its original draft and now stands complete As with all my symphonies Symphony No 5 has five movements in a vaguely palindrome form

Beethoven Symphony No.5 in C Minor, Op.67, 2019 Beethoven s metronome markings aroused much controversy among musicologists and performing musicians For Beethoven tempo is a fundamental element of the music s character Beethoven included metronome markings in his music to communicate his ideas concerning tempi in a more specific manner Ironically his metronome markings are often ignored by many performers and conductors as evidenced in the recordings and live performance reviews There is a group of

scholars and performers who tend to disregard Beethoven's metronome markings while another group believes they are sensible and workable. This paper discusses the metronome markings and the Affective Key Characteristics in the music of Beethoven focusing specifically on his Fifth Symphony Op 67. Listeners and performers often have their impression of how a specific key feels but such impressions are personal and may vary. The choice of the key by any given composer could be a vital hint of how the composer wanted the music to be interpreted in terms of character. The first chapter focuses on the discussion of issues pertaining to Beethoven's metronome markings including commentary from Beethoven himself as well as other musicians and music scholars. Chapter 2 discusses issues pertaining to Affective Key Characteristics explaining the association of meaning and emotions in different Affective Keys followed by a brief introduction of the concept of Affektenlehre and unequal temperament tuning. Chapters 3 and 4 contain detailed discussion on the interpretation of Beethoven's Fifth Symphony with specific musical examples and frequent reference to the musical context and the Affective Key Characteristics descriptions. In conclusion, this document demonstrates how the unique expressive properties of keys could be a significant asset for exploring various characters that are embedded within the music. By considering this, we could open up a number of interpretative possibilities that are not necessarily tied to metronome markings.

The New Bruckner

Dermot Gault, 2016-03-03. The New Bruckner provides a valuable study of Bruckner's music focusing on the interaction of biography, textual scholarship, reception history, and analysis. Dr. Dermot Gault conveys a broad chronological narrative of Bruckner's compositional development, interpolating analytical commentaries on the works and critical accounts of the notoriously complex and editorial issues. Gault corrects longstanding misconceptions about the composer's revision process and its relationship with the early editions and widely held critical opinions. Bruckner's constantly evolving engagement with symphonic form is traced by taking each revision in due order rather than by taking each symphony on its own and by relating the symphonies to other mature works such as the Te Deum, the three great Masses, and the Quintet, and argues that Bruckner's music became more organic and less schematic as the result of his revisions. The book will be essential reading for those studying Bruckner's compositions, the complex history of their reception, and late Romantic music in general.
