essence The second one consists of a departure from the traditional scientific sources of the classicists and in part neoclassicists Exploiting relevant areas of their works the authors outline the theoretical framework necessary to promote a healthy version of sustainability Of utmost interest prove to be areas such as the formation process of natural prices and natural rate of interest placing growth before employment and placing production before distribution consumption and social justice The main idea of the book consists of a call for breaking away from the impure forms of the theory of sustainable development and its reconstruction through the reconciliation with the laws of healthy growth as they are highlighted in the works of the founders The authors make the case for an approach to sustainable development that is holistic macroeconomic and institutionalist where social ecological and economic components are reconciled This work presents a fresh perspective in the context of current works on sustainability serving as an accessible research resource and public policy decision guide

From Global Poverty to Global Equality Pablo Gilabert, 2012-03-29 Do we have positive duties to help others in need or are our moral duties only negative focused on not harming them Are any of the former positive duties duties of justice that respond to enforceable rights Is their scope global Should we aim for global equality besides the eradication of severe global poverty Is a humanist approach to egalitarian distribution based on rights that all human beings as such have defensible or must egalitarian distribution be seen in an associativist way as tracking existing frameworks such as statehood and economic interdependence Are the eradication of global poverty and the achievement of global equality practically feasible or are they hopelessly utopian wishes This book argues that there are basic positive duties of justice to help eradicate severe global poverty that global egalitarian principles are also reasonable even if they cannot be fully realized in the short term and that there are dynamic duties to enhance the feasibility of the transition from global poverty to global equality in the face of nonideal circumstances such as the absence of robust international institutions and the lack of a strong ethos of cosmopolitan solidarity The very notion of feasibility is crucial for normative reasoning but has received little explicit philosophical discussion This book offers a systematic exploration of that concept as well as of its application to global justice It also arbitrates the current debate between humanist and associativist accounts of the scope of distributive justice Drawing on moral contractualism the view that we ought to follow the principles that no one could reasonably reject this book provides a novel defense of humanism challenges several versions of associativism which remains

the most popular view among political philosophers and seeks to integrate the insights underlying both views *Social Theory* Berch Berberoglu, 2017-01-06 *Social Theory* provides a sophisticated yet highly accessible introduction to classical and contemporary social theories The author's concise presentation allows students and instructors to focus on central themes The text lets theorists speak for themselves presenting key passages from each theorist's corpus bringing theory to life The approach allows instructors the opportunity to help students learn to unpack sometimes complex prose just as it offers inroads to class discussion Chapters on Addams and early feminism on Habermas and the Frankfurt School on Foucault and on globalization and social movements round out contemporary coverage The book presents and explains key theories just as it provides an introduction to central debates about them **Research on Technology in Social Studies Education**

John Lee, Adam M. Friedman, 2009-11-01 Despite technology's presence in virtually every public school its documented familiarity and use by youth outside of school and the wealth of resources it provides for teaching social studies there has been relatively little empirical research on its effectiveness for the teaching and learning of social studies In an effort to begin to fill this gap in research literature this book focuses on research on technology in social studies education The objectives of this volume are threefold to describe research frameworks provide examples of empirical research and chart a course for future research endeavors Accordingly the volume is divided into three overarching sections research constructs and contexts research reports and research reviews The need for research is particularly acute within the field of social studies and technology As the primary purpose of social studies is to prepare the young people of today to be the citizens of tomorrow it is necessary to examine how technology tools impact improve and otherwise affect teaching and learning in social studies Given these circumstances we have prepared this collection of research conceptualizations reports and reviews to achieve three goals 1 Put forward reports on how research is being conducted in the field 2 Present findings from well designed research studies that provide evidence of how specific applications of technology are affecting teaching and learning in social studies 3 Showcase reviews of research in social studies It is with this framework that we edited this volume *Research on Technology and Social Studies Education* as an effort to address emerging concerns related to theorizing about the field and reporting research in social studies and technology The book is divided into four sections The first section of the book includes three descriptions of research constructs and contexts in social studies and technology The second section is focused on research reports from studies of student learning in social studies with technology The third section contains research reports on teachers pedagogical considerations for using technology in social studies In the fourth and final section we present work that broadly reviews and critiques research in focused areas of social studies and technology This volume contains twelve chapters each of which focuses on social studies content and pedagogy and how the field is affected and enhanced with technology The volume includes research and theoretical works on various topics including digital history digital video geography technology use in the K 12 social studies classroom and artificial intelligence
