V 55 Diesel Engine:

Centurion vs T-55 Simon Dunstan, 2022-09-08 A tightly focused illustrated study comparing the design development and combat performance of two of the Cold War's first main battle tanks. Conceived at the height of World War II, the British Centurion and the Soviet T-55 were initially expected to counter the formidable Panther and Tiger tanks of Germany. But as the Cold War unfolded, these machines prepared instead for the coming struggle between NATO and the Warsaw Pact. Though they never fought in Europe, these two tanks became the mainstay of the Cold War's proxy forces around the world. From Korea to the Middle East and on to Angola, these two armored combatants clashed repeatedly, reaching their crescendo on the Golan Heights during the Yom Kippur War where 177 Centurions of the IDF took on a vastly superior Arab force. Presented with highly detailed digital artwork and photographs, this is a tightly focused study of the development and operational history of two of the Cold War's first main battle tanks.

T-54/55 Anthony Tucker-Jones, 2020-01-31 The Soviet T-54/55 is probably the best known tank of the Cold War and it was produced in greater numbers than any other tank in history. It first went into service just after the Second World War and over 70,000 were made, and its design was so successful that it even outlasted its successor, the T-62. For a generation, it formed the backbone of the armored forces of the Warsaw Pact and it was exported all over the world, remaining in the front line until the 1990s. This photographic history in the Images of War series by Anthony Tucker-Jones is the ideal introduction to it. In over 150 archive photographs and a detailed analytical text, he traces the design and development of the T-54/55 and records its operational history. He describes how it was conceived as a main battle tank, an all-rounder contrasting with the light, medium, and heavy tanks produced in the past, and it proved to be extraordinarily effective. It was as adaptable as it was long-lasting, different versions being produced by China, Czechoslovakia, Poland, and Romania. Its relatively simple design also meant it was easy to maintain, even in difficult conditions, and it was used by armies across the Third World, in particular in wars in Angola, Ethiopia, Mozambique, and Somalia. Anthony Tucker-Jones's history of this remarkable armored vehicle will be absorbing reading for tank enthusiasts and a valuable source for modelers.
