Nanohybrid Materials for Water Purification Sarat K. Swain, 2022-08-12 This book comprehensively reviews the key topics in the area of nanocomposites and hybrid materials used for waste water treatment and purification. It covers materials chemistry, various synthesis approaches and properties of these nanomaterials for the different water purification techniques. It provides new direction to the readers to better understand the chemistry behind these materials and the methods to improve their properties. This book will be a very valuable reference source for graduates and postgraduates, engineers, research scholars primarily in the field of material science, water nanoscience and nanotechnology, material scientists, researchers in the water related area, scientists working in water treatment plants and pollution mitigation industries.

Enhanced Chitosan Material for Water Treatment Ephraim Igberase, Peter Ogbemudia Osifo, Tumisang Seodigeng, Ikenna Emeji, 2021-04-29 This book reviews some of the latest developments in the field of water treatment using multi functional chitosan based materials. It covers the production of chitosan beads and membranes from chitosan powder as well as modification techniques for enhancing the material for commercial and industrial purposes. The book summarizes the results of experimental adsorption-desorption studies for elucidating the underlying reaction mechanism of heavy metal removal from wastewater, presenting an advanced overview of an array of characterization techniques such as Fourier transform infrared spectroscopy, thermogravimetric analysis, x-ray diffraction and scanning electron microscopy. Additionally, it features a look at the development and application of specialized engineering software and image analysis for modelling the kinetics of adsorption. This book is ideal for scientists and engineers working in the broader field of environmental materials science. It is all well suited for chemists as well as industrial and civil engineers interested in wastewater treatment and mitigation of water pollution.

Reimagining Effective Stakeholder Governance Practices in Higher Education Felix Omal, 2023-06-22 This book examines the role of the university governing council and the changing nature of university governance using a case study from a South African university. The book considers the key challenging features of South African higher education in relation to current competing international trends in higher education governance. It shows how major decision makers within the university operate within competing governance knowledge domains to exercise good practice within turbulent institutional contexts. These diverse institutional cultures are examined in terms of their contribution to various governance practices, presenting an emerging model of university governance known as the structural systemic cultural model. Throwing light on the nature of challenges associated with the governance of universities in the post-apartheid era, this book will be of interest to academics, researchers and postgraduate students in the fields of higher education, comparative education and education governance. Also, it will appeal to university councils and management across Africa.

Corrupted Jonathan D Jansen, 2023-02 Through investigatory reports and interviews, Jonathan Jansen reveals the structural conditions for chronic dysfunction in a sample of South African universities. He reveals the political economy at

work and the intense competition for resources on campuses He also provides interventions for these fragile institutions Why do some universities seem to be in a constant state of turmoil and dysfunction Jonathan Jansen explores the root causes of chronic instability in a sample of South African universities Through scrutiny of investigatory reports and interviews with more than 100 university managers and government officials Jansen finds that at the heart of the dysfunction in universities is an intense and sometimes deadly competition for resources especially on campuses located in impoverished communities It is not the lack of institutional resources but their concentration in a university that draws a mix of corrupt actors from local politicians and taxi operators to members of council and management into a never ending run on the material such as money for infrastructure and symbolic namely graduation certificates for sale assets of these institutions Jansen argues that the problem won't be solved through investments in capacity building alone because the combination of institutional capacity and institutional integrity contributes to serial instability in universities Jansen makes an important intervention to understanding the root causes and offers interventions to produce stabilities such as the depoliticisation of university councils and appointing academics of integrity and capacity in the management and leadership of these fragile institutions This groundbreaking and long overdue study will offer a promising way forward for universities to better serve their communities and the country more broadly Innovation Africa Olugbenga Adesida, Geci Karuri-Sebina, João

Resende-Santos, 2016-03-31 This book contains a number of case studies that examine the nature and origins of emerging high end innovation hubs in Africa It analyses highlights and draws lessons from some of the most promising and successful innovation cases in Africa today exploring the key factors driving their successful emergence growth and future prospects

Have You Looked @ VUT Lately? Vaal University of Technology, 2006 *Innovations in Circular Economy and Renewable Energy in Africa* Mona-Maria Narra, Satyanarayana Narra, 2024-10-14 In many African countries access to electricity and modern energy fuels remains a significant concern Over 570 million people in Sub Saharan Africa still lack electricity and only 18% have access to modern cooking fuels The region faces immense challenges including massive debts lack of maintenance and system failures underscoring the urgent need for investment in the energy sector's transition Africa's overreliance on fossil fuels and the growing demand for energy driven by economic expansion and population growth could lead to sharp increases in greenhouse gas emissions Meanwhile urbanization economic activities and rising living standards are increasing waste production making waste management a pressing issue The absence of adequate waste treatment technologies financing and regulatory frameworks exacerbates this challenge Biomass remains a predominant energy source in Sub Saharan Africa often used in its raw state leading to health hazards from incomplete combustion However the continent's abundant agricultural residues and other energetic wastes offer a significant opportunity These can be transformed into various energy carriers helping to meet or supplement Africa's energy and fuel needs The current situation presents a unique opportunity for Africa to shift from a fossil based economy to a sustainable green economy Leveraging

technology knowledge and skills can support this rapid transition and drive economic growth Innovations in Circular Economy and Renewable Energy highlights current advancements in waste management biomass utilization for energy and innovations in green hydrogen production in Africa This book showcases predominantly African research and insights first presented at the First International Conference on Circular Economy Renewable Energy and Green Hydrogen in Kumasi Ghana in September 2023 Dive into this essential resource to explore transformative waste to energy technologies the hybridization and flexibilization of renewable energy systems and the path towards a sustainable future for Africa
