Capacity Building for IT in Education in Developing Countries Gail Marshall, Mikko Ruohonen, 2013-03-14 Deryn Watson CapBIT 97 Capacity Building for Information Technologies in Education in Developing Countries from which this publication derives was an

invited IFIP working conference sponsored by Working Groups in secondary WG 3.1 elementary WG 3.5 and vocational and professional WG 3.4 education under the auspices of IFIP Technical Committee for Education TC3. The conference was held in Harare Zimbabwe 25th-29th August 1997. CapBIT 97 was the first time that the IFIP Technical Committee for Education had held a conference in a developing country. When the Computer Society of Zimbabwe offered to host the event we determined that the location and conference topic reflect the importance of issues facing countries at all stages of development especially Information Technologies (IT) development. Information Technologies have become within a short time one of the basic building blocks of modern industrial society. Understanding IT and mastering basic skills and concepts of IT are now regarded as part of the core education of all people around the world alongside reading and writing. IT now permeates the business environment and underpins the success of modern corporations as well as providing government with cost effective civil service systems. At the same time the tools and technologies of IT are of value in the process of learning and in the organisation and management of learning institutions.
