SDGs in Africa and the Middle East Region Ismaila Rimi Abubakar,Izrael da Silva,Rudi Pretorius,Khaled Tarabieh,2024-09-01 Africa is one of the most vulnerable regions and one where the implementation of the SDGs is particularly urgent Underinvestments in natural conservation are increasing the vulnerability of people across many African countries whose well being is endangered by deteriorating socio economic and environmental conditions This volume provides a contribution towards showcasing how natural resources may be more efficiently used and investments may be mobilised to augment the limited public sector funds available to achieve the SDGs This book is part of the 100 papers to accelerate the implementation of the UN Sustainable Development Goals initiative **Yearbook of International Organizations 2014-2015, Volumes 1a & 1b (Set)** Union of International Associations,2014-06-16 Volume 1 A and B covers international organizations throughout the world comprising their aims activities and events *Regime and Education in Zimbabwe* Bekithemba Dube,Albert Mufanechiya,2024-06-10 This collection focuses on the post independence educational development in Zimbabwe It shows how the ZANU PF regime has presided over the demise of education and covers a wide range of topics such as violence against teachers poor salaries student activism minority languages and curriculum innovations This volume argues that the regime has used education as a tool for repression Curriculum

innovations introduced and implemented in Zimbabwe have little to do with improving the performance of the learners and more to do with stopping teachers from pushing the regime change agenda. Consequently, this has resulted in a nation in crisis marked with high turnover, poor economy and mass exodus of teachers and learners. The contributors to this volume make various suggestions which could recenter education towards addressing the experiences of the learners as opposed to being used as a tool to push repression and thwart democracy.

Decolonisation, Africanisation and the Philosophy Curriculum Edwin Etieyibo, 2019-10-23. This book appropriately titled *Decolonisation, Africanisation and the Philosophy Curriculum* signposts and captures issues about philosophy, the philosophy curriculum and its decolonisation and Africanisation. This topic is of critical importance at present for the discipline of philosophy, not the least because philosophy and the current philosophical canons are perceived to be improvised by virtue of their historical marginalisation and exclusion of other valuable and important philosophical traditions and perspectives. The continued marginalisation and exclusion of one such philosophical tradition and perspective, i.e. African philosophy, connects to issues of space contestations and raises questions of justice. The chapters in this book engage with all of these issues and they also attempt to make sense of what it will mean for philosophy and the philosophy curriculum to be decolonised and Africanised, how to go about achieving this task and what the challenges and problems are that confront efforts to decolonise and Africanise the philosophy curriculum. Furthermore, the contributors initiate discussions on the value and importance of non-Western philosophical traditions and perspectives and by so doing challenge the dormant and triumphant narrative and hegemony of Western philosophy as well as the centrality accorded to it in philosophical discourse. The chapters in this book were originally published as articles in the *South African Journal of Philosophy*.

Disease Control Priorities, Third Edition (Volume 2) Robert Black, Ramanan Laxminarayan, Marleen Temmerman, Neff Walker, 2016-04-11. The evaluation of reproductive, maternal, newborn and child health (RMNCH) by the Disease Control Priorities Third Edition (DCP3) focuses on maternal conditions, childhood illness and malnutrition. Specifically, the chapters address acute illness and undernutrition in children, principally under age 5. It also covers maternal mortality, morbidity, stillbirth and influences to pregnancy and pre-pregnancy. Volume 3 focuses on developments since the publication of DCP2 and will also include the transition to older childhood, in particular the overlap and commonality with the child development volume. The DCP3 evaluation of these conditions produced three key findings: 1. There is significant difficulty in measuring the burden of key conditions such as unintended pregnancy, unsafe abortion, nonsexually transmitted infections, infertility and violence against women. 2. Investments in the continuum of care can have significant returns for improved and equitable access, health, poverty and health systems. 3. There is a large difference in how RMNCH conditions affect different income groups; investments in RMNCH can lessen the disparity in terms of both health and financial risk.
