Zimsec Maths 2014 Paper November:

Validating Technological Innovation David Coniam, Peter Falvey, 2016-04-02 This book discusses Hong Kong's use of onscreen marking OSM in public examinations. Given that Hong Kong leads the way in OSM innovation, this book has arisen from a recognised need to provide a comprehensive coherent account of the findings of various separate but linked validation studies of onscreen public examinations in Hong Kong. The authors discuss their experience of the validation process, demonstrating how high stakes innovation should be fully validated by a series of research studies in order to satisfy key stakeholders.

Gendering Ethnicity in African Women's Lives Jan Bender Shetler, 2015-05-05 The elegists of ancient Rome's most introspective poets filled their works with vivid first person accounts of dreams. Emma Scioli examines these varied and visually striking textual dreamscapes, arguing that the poets exploited dynamics of visual representation to share with readers the intensely personal experience of dreaming.

The African Mother Tongue and Mathematical Ideas Abdul Karim Bangura, 2020-06-02 This book by renowned scholar Dr Abdul Karim Bangura combines linguistics and mathematics to show how and why African centred mathematical ideas can be a driving force in Africa's development efforts. Bangura explores the concept that Africa has been the centre of the History of Mathematics for thousands of years, as the civilizations that emerged across the continent developed contributions which would enrich both ancient and modern understanding of nature through mathematics. However, scholars and other professionals working in the field of mathematics education in Africa have identified a plethora of issues in carrying out their tasks. This is highlighted by one of the most compelling arguments in the book, which is that a major reason for these problems is the fact that the African mother tongues have been greatly neglected in the teaching of mathematics in the continent. Bangura asserts that a change has to be made in order for Africa to benefit from the exceptional opportunities mathematics offer, showing that even if there is a great body of work connecting linguistics and mathematics, few analyses have been performed on the link between African languages and mathematics, and the ones that have been made are not theoretically grounded on linguistics. Thus, the book begins by identifying the objects of study of linguistics and mathematics and delineates which ones they have in common. Next, since the object of study of linguistics is language, the nine design features of language are employed to examine each of the objects as it pertains to African languages. After that, mathematical ideas of sustainability and those of tipping points are suggested as means to help Africa's development efforts.

Handbook of Research on Politics in the Computer Age Solo, Ashu M. G., 2019-08-30 Technology and particularly the Internet have caused many changes in the realm of politics. Aspects of engineering, computer science, mathematics, or natural science can be applied to politics. Politicians and candidates use their own websites and social network profiles to get their message out. Revolutions in many countries in the Middle East and North Africa have started in large part due to social networking websites such as Facebook and Twitter. Social networking has also played a role in protests and riots in numerous countries. The mainstream media no longer has a monopoly on

political commentary as anybody can set up a blog or post a video online Now political activists can network together online The Handbook of Research on Politics in the Computer Age is a pivotal reference source that serves to increase the understanding of methods for politics in the computer age the effectiveness of these methods and tools for analyzing these methods The book includes research chapters on different aspects of politics with information technology engineering computer science or math from 27 researchers at 20 universities and research organizations in Belgium Brazil Cape Verde Egypt Finland France Hungary Italy Mexico Nigeria Norway Portugal and the United States of America Highlighting topics such as online campaigning and fake news the prospective audience includes but is not limited to researchers political and public policy analysts political scientists engineers computer scientists political campaign managers and staff politicians and their staff political operatives professors students and individuals working in the fields of politics e politics e government new media and communication studies and Internet marketing *The Times Index* ,2005 Indexes the Times and its supplements
