Fombad, Nico Steytler, 2021-03-18 The third wave of democracy that reached African shores at the end of the Cold War brought with it a dramatic decline from 1990 onwards in dictatorships military regimes one party governments and presidents for life Multiparty democracy was at the core of the constitutional revolutions that swept through most of Africa in those watershed years However that wave is either losing momentum or receding or being reversed in its entirety This volume examines democracy and elections in Africa a focus motivated by two concerns First after 30 years it is important to take stock of the state of constitutional democracy on the continent The democratic gains of the 1990s and 2000s seem to be falling by the wayside with the evidence mounting that regimes are concealing authoritarianism under the veneer of elections doing so in an international context where populist regimes are on the rise and free and fair multiparty elections are consequently no longer a given It is becoming a battle to protect and retain constitutional democracy The second reason for this volume s focus on democracy and elections is that multiparty democracy is essential for the proper functioning of the state in addressing the major problems facing Africa internal conflict inequality and lack of development and poor governance and corruption The focus of this volume is thus on how competitive politics or multiparty democracy can be realized and how through competition such politics could lead to better policy and practice outcomes **Sustainable Agriculture and the Environment** Muhammad Farooq, Nirmali Gogoi, Michele Pisante, 2023-04-14 Sustainable Agriculture and the Environment describes the relationship of agriculture society nature and the environment sustainable agriculture and sustainable development goals management of biophysical resources for sustainable food and environment traditional knowledge and innovative options and social and policy aspects of sustainable agriculture The book presents both environmental and economic principles helping readers in the development and application of robust policy and good institutional systems that

Artificial Intelligence and International Conflict in Cyberspace Fabio Cristiano,Dennis Broeders,François Delerue,Frédéric Douzet,Aude Géry,2023-05-11 This edited volume explores how artificial intelligence AI is transforming international conflict in cyberspace Over the past three decades cyberspace developed into a crucial frontier and issue of international conflict However scholarly work on the relationship between AI and conflict in cyberspace has been produced along somewhat rigid disciplinary boundaries and an even more rigid sociotechnical divide wherein technical and social scholarship are seldomly brought into a conversation This is the first volume to address these themes through a comprehensive and cross disciplinary approach With the intent of exploring the question what is at stake with the use of automation in international conflict in cyberspace through AI the chapters in the volume focus on three broad themes namely 1 technical and operational 2 strategic and geopolitical and 3 normative and legal These also constitute the three parts in which the chapters of this volume are organised although these thematic sections should not be considered as an analytical or a disciplinary demarcation This book will be of much interest to students of cyber conflict AI security studies and International Relations The Open Access version of this book is available for free in PDF format as Open Access from the individual product page at www.routledge.com It has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

The Right to Strike in International Law Jeffrey Vogt,Janice Bellace,Lance Compa,K D Ewing,John Hendy QC,Klaus Lörcher,Tonia Novitz,2020-03-19 This monograph was originally developed as a direct response to the claim made by members of the Employers Group at the 2012 International Labour Conference namely that the right to strike is not protected in international law and in particular by ILO Convention 87 on the right to freedom of association The group's apparent aim was to sow sufficient doubt as to the existence of an internationally protected right so that governments might seek to limit or prohibit the right to strike at the national level while still claiming compliance with their international obligations In consequence some governments have seized on the employers arguments to justify new limitations on that right The Right to Strike in International Law not merely refutes this claim but is the only complete and exhaustive analysis on this subject Based on deep legal research it finds that there is simply no credible basis for the claim that the right to strike does not enjoy the protection of international law indeed the authors demonstrate that it has attained the status of customary international law

Women Law and Power Makanatsa Makonese,2021-06-25 Without adequate protection and consideration from the state women were left out of Zimbabwe's Fast Land Reform Programme at the turn of the century Leaving them to fight for land in a murky convoluted system will not address women's rights to it Giving specific ethical and legal attention to women's rights and needs is the only way to guard against land and other resources begin co

opted by the privileged and those with the requisite social financial and political capital Some commentators have argued that Zimbabwean women were better off identifying with Zimbabwean men as blacks in taking land from the former white farmers than to concentrate on their needs as women during the FTLRP The primary battle was to take the land from the white farmer after which a secondary battle by women to take land from men would ensue Twenty years after the commencement of the FTLRP the question remains whether the secondary battle by black women to take over land from black men has started and whether there are any chances that such a battle will ever be fought and won
