Technological Innovation Across Nations Marina van Geenhuizen, Chihiro Watanabe, Vinnie Jauhari, Enno Masurel, 2009-04-05 Innovation is the driving force behind economic growth The knowledge

that fosters innovation builds on both systematic research and serendipity. The availability of new knowledge, be it technological or organizational, is however sufficient. An institutional structure must be in place that enhances mutual learning among the actors involved and that stimulates cooperation as well as competition. This recognition has inspired this volume which focuses on national innovation systems and sectoral technology innovation systems that differ widely between countries due to their diverse historical paths and distinctive cultural and societal features. With regard to theory, most chapters incorporate a mix of endogenous growth theory and evolutionary thinking. Endogenous growth theory places an emphasis on the interplay between technological knowledge and various structural characteristics of the economy and society as well as on the results of economic growth. Concepts related to technology development, accumulation of knowledge on technology and technology diffusion feature prominently here. In evolutionary thinking and in particular coevolutionary thinking, the focus is on close links between technology and institutions whereby the functionality of technology is influenced by certain dynamic interactions with institutional systems. Information technology turns out to be a clear example of such a development.

Baniya, a derivative of the Sanskrit word Vanij, is a term synonymous with India's trader class. Over the decades, these capitalists spread their footprint across vast sectors of the economy from steel and mining to telecom and retail. And now even e-tail. Nikhil Inamdar's **Rokda** features the stories of a few pioneering men from this mercantile community: Radheshyam Agarwal and Radheshyam Goenka, founders of the cosmetic major Emami; Rohit Bansal, co-founder of Snapdeal; Neeraj Gupta, founder of Meru Cabs; and V K Bansal, a humble mathematics tutor whose genius spawned a massive coaching industry in Kota, amongst others. Through the triumphs and tribulations of these men in the epoch-marking India's entire post-independence struggle with entrepreneurship, from the License Raj to the opening up of the floodgates in 1991 and the dawn of the digital era, **Rokda** seeks to uncover the indomitable spirit of the Baniya.
