Reaching and Teaching the Child with Autism Spectrum

Disorder Heather MacKenzie, 2008-04-15 This book provides a positive approach to understanding and educating children on the autism spectrum. The book gives greater insight into the perspective and behavior of a child with autism and explores how the child's learning preferences, strengths, and interests can be used to facilitate learning and enhance motivation.

Strategies to Support Children with Autism and Other Complex Needs Christine Macintyre, 2015-10-23 Working with young children on the autistic spectrum and supporting them as they learn can be fascinating, challenging, often overwhelmingly difficult, but more than anything else, hugely rewarding. *Strategies to Support Children with Autism and Other Complex Needs* bridges the gap between explaining what autism is and finding ways to interact through having a balance of play activities interspersed with more formal teaching of skills of everyday living. This highly practical text provides a bank of strategies that are specially designed to be matched to the developmental status of each child. These strategies are endorsed by academics who have monitored the children's responses in communicating, pretending, playing, moving, and singing, and describe how the children have responded positively over time. This book covers a variety of topics such as: The importance of play for enhancing learning for children with autism and other complex needs; Evaluating different ways of developing communication; Transferring learning from one environment to another to aid memorizing; Understanding the impact of sensory hypo and hyperactivity on children's learning; Developing a Theory of Mind; The importance of movement, music, and having fun; Observation and assessment schedules are provided along with clear and helpful evaluation forms which show staff in primary and early years settings how children on the autistic spectrum can be helped to make meaningful and encouraging progress. This text is a vital read for any practitioners working with children on the autistic spectrum or with complex learning difficulties.

Early Learning through Play Kristin Grabarek, Mary R. Lanni, 2019-03-13 This creative guidebook teaches librarians in diverse communities how to develop and implement early learning programming beyond traditional storytimes. While traditional library storytimes are excellent tools for families, equally important is play. Children learn through play in many ways; it stimulates exploration and curiosity and builds gross and fine motor skills that are critical to reading and writing success. Perhaps most importantly, play has the power to cross barriers of culture and language, allowing families from differing backgrounds to learn together. In this book, Kristin Grabarek and Mary R. Lanni, the pioneers of Little University, an early learning program that focuses on play-based learning, share their experiences and provide guidance for implementing similar programs at libraries of various sizes and budgets. They teach readers how to create programs for a diverse group of families, work with outside providers, choose supplies, estimate costs, market your programming, and overcome the challenges of both big and small budgets and many or few patrons. These practical plans will enhance storytimes and even help build a brand new early learning program.

Angels at the Eastport Bridge MacIntyre,2011-09-15 Though it may seem a bit complicated the story is simple and when all the pieces are laid out it is plain to see where it all began It started with one single human by the name of Tane MacGregor one single officially insane homeless dust rag of a man He occasionally caught glances from passing strangers as he swung his feet rhythmically from the drawbridge over the calm waters of Spa Creek and he was often found in the company of angels As it was said MacGregor was seen as the glue the string binding all the events and beings which created a rather remarkable occurrence in the soft beautifully adjacent scenic towns of Annapolis and Eastport and in particular about the small Eastport Drawbridge over Spa Creek spanning and dividing the two Now as the story would be

told and retold in most homes and taverns around the Chesapeake for many years it was too easily called coincidence True it began at a certain time with a certain person in a certain situation accompanied by an incredible series of events people celestial beings lawyers homeless schizophrenics ghosts God junk food and small deviations in time and space with warring definitions of good and evil all coming together in a perfect harmonic mix but coincidence
