Economic Setting details the real world application of economic principles and financial strategy in making better business decisions Debating Immigration in the Age of Terrorism, Polarization, and Trump Joshua Woods,C. Damien

Arthur,2017-09-27 This book offers a broad interdisciplinary approach to the changes in the U S immigration debate before and after 9 11 A nation s reaction to foreigners has as much to do with sociology as it does with political science economics and psychology Without drawing on this knowledge our understanding of the immigration debate remains mundane partial and imperfect Therefore our story accounts for multiple factors including culture and politics power organizations social psychological processes and political change Examining this relationship in the contemporary context requires a lengthy voyage across academic disciplines a synthesis of seemingly contradictory assumptions and a grasp of research traditions so vast and confusing that an accurate rendering may seem implausible And yet to tell the story of the immigration debate in the age of terrorism polarization and Trump in any other way is to tell it in part The immigration debate in the United States has always been about openness Two questions in particular how open should the door be and what type of immigrant should walk through it have characterized policy disputes for well over a century In the current debate expansionists want to see more legal immigrants in the U S and greater tolerance if not respect for immigrants Restrictionists favor lower levels of immigration stronger borders and tighter law enforcement measures to stop the stream of illegal migration and alleged crime The aim of this book is to describe how these opposing views materialized in the news media political rhetoric and ultimately in policy Much of our argument rests on the idea that history matters that the dominant narrative about immigration is in constant flux and that the winner of the immigration debate is determined by a vector of contextual elements the joint impact of current events enduring traditions and political economic forces Our approach to the immigration debate avoids deterministic claims and grand scale projections Although we argue with conviction that a climate of fear played an important role in shaping the debate the fear itself and its effects on social attitudes and public policy were neither inevitable nor necessarily long lasting **Globalization** George Yungchih Wang,2019-10-23 Globalization is a process of interaction and integration among people businesses institutions and governments of different countries in many aspects surrounding human lives It is not a threat to sovereignty or a form of Westernization This book discusses international economics and globalization explores global business strategies deliberates business ethics and corporate social responsibility and examines other related aspects from a global perspective *General Technical Report SRS* ,1999
