the earliest stages of development when seventy five percent to ninety percent of the labor force is engaged in agriculture
Concentration of land ownership has been a common and usually quite damaging feature of most societies throughout history
as both the cause and the result of access to power Highly unequal control of land typically implies severe inequality of
income and welfare as well Landlessness has been at the root of many of the world s most serious and persistent problems
including severe exploitation and the deprivation of political rights and basic human needs Historically the motivation for
many revolutions has been access to land This volume reviews the land reform experiences of multiple countries during the
twentieth century The experiences I covered illustrate the widespread need for reform the great difficulties facing major
changes and the extreme cost of failure in delicate political moments Looking ahead the biggest challenge will be to avoid
the injustices and inequality that have accompanied land concentration in the past **Catalogue of the Library of the**
