It is clear from early on in this book that the author's main interest lies in the management of peripheral nerves particularly in the limbs. There is a section on reconstructive microsurgery of the brachial plexus following trauma and a section on limb replantation. Says the author: 'The reconstructive microsurgery experience helped me to modernize reparative plastic surgery in Romania in reconstructive plastic surgery and reconstructive microsurgery by radically changing the surgical approach. This allowed also for new procedures in Dupuytren's Disease, Volkmann and post burn contractures approach revolutionizing everything that was repair surgery of any extremity cephalic superior inferior but also the extension of reconstructions in the large defects of supraskeletal soft parts' **Cardiac Arrhythmia** Philip J.
