McMillan,2006 **Design for the Changing Educational Landscape** Andrew Harrison,Les Hutton,2013-10-15 The whole landscape of space use is undergoing a radical transformation In the workplace a period of unprecedented change has created a mix of responses with one overriding outcome observable worldwide the rise of distributed space In the learning environment the social political economic and technological changes responsible for this shift have been further compounded by constantly developing theories of learning and teaching and a wide acceptance of the importance of learning as the core of the community resulting in the blending of all aspects of learning into one seamless experience This book attempts to look at all the forces driving the provision and pedagogic performance of the many spaces real and virtual that now accommodate the experience of learning and provide pointers towards the creation and design of learning centred communities Part 1 looks at the entire learning universe as it now stands tracks the way in which its constituent parts came to occupy their role assesses how they have responded to a complex of drivers and gauges their success in dealing with renewed pressures to perform It shows that what is required is innovation within the spaces and integration between them Part 2 finds many examples of innovation in evidence across the world in schools the higher and further education campus and in business and cultural spaces but an almost total absence of integration Part 3 offers a model that redefines the learning landscape in terms of learning outcomes mapping spatial requirements and activities into a detailed mechanism that will achieve the best outcome at the most appropriate scale By encouraging stakeholders to creating an events based rather than space based identity the book hopes to point the way to a fully integrated learning landscape a learning community **Hybrid**

Urbanism Nezar AlSayyad,2001-03-30 Despite strong forces toward globalization much of late 20th century urbanism demonstrates a movement toward cultural differentiation Such factors as ethnicity and religious and cultural heritages have led to the concept of hybridity as a shaper of identity Challenging the common assumption that hybrid peoples create hybrid places and hybrid places house hybrid people this book suggests that hybrid environments do not always accommodate

pluralistic tendencies or multicultural practices In contrast to the standard position that hybrid space results from the merger of two cultures the book introduces the concept of a third place and argues for a more sophisticated understanding of the principal In contributed chapters the book provides case studies of the third place enabling a comparative and transnational examination of the complexity of hybridity The book is divided into two parts Part one deals with pre 20th century examples of places that capture the intersection of modernity and hybridity Part two considers equivalent sites in the late 20th century demonstrating how hybridity has been a central feature of globalization
