Tola Ma Vie Mes Recircves:

Proust Was a Neuroscientist Jonah Lehrer, 2008-09-01 The New York Times bestselling author provides an entertaining look at how artists enlighten us about the workings of the brain New York magazine In this book the author of *How We Decide* and *Imagine How Creativity Works* writes skillfully and coherently about both art and science and about the connections between the two Entertainment Weekly In this technology driven age it s tempting to believe that science can solve every mystery After all it s cured countless diseases and sent humans into space But as Jonah Lehrer explains science is not the only path to knowledge In fact when it comes to understanding the brain art got there first Taking a group of artists a painter a poet a chef a composer and a handful of novelists Lehrer shows how each one discovered an essential truth about the mind that science is only now rediscovering We learn for example how Proust first revealed the fallibility of memory how George Eliot discovered the brain s malleability how the French chef Escoffier discovered umami the fifth taste how C zanne worked out the subtleties of vision and how Gertrude Stein exposed the deep structure of language a full half century before the work of Noam Chomsky and other linguists More broadly Lehrer shows that there s a cost to reducing everything to atoms and acronyms and genes Measurement is not the same as understanding and art knows this better than science does An ingenious blend of biography criticism and first rate science writing *Proust Was a Neuroscientist* urges science and art to listen more closely to each other for willing minds can combine the best of both to brilliant effect His book marks the arrival of an important new thinker Wise and fresh Los Angeles Times **Journal pour tous** ,1862 **Handbook for Travellers in Central Italy ...
