Manual on Assisted Reproduction T. Rabe, K. Dietrich, Thomas Strowitzki, 2012-12-06 Our knowledge of reproductive medicine has expanded rapidly since the birth of Louise Brown the first baby to be conceived by in vitro fertilization which was performed by Professors Patrick Steptoe and Bob Edwards in Oldham England in 1978 Hardly a year goes by without the development of a new or a modification of an existing method of assisted reproduction Within a relatively short period in vitro fertilization has been introduced into the treatment of female infertility Intracytoplasmic sperm injection has also created new opportunities for the treatment of male infertility The first edition of this book was published in 1996 In the second edition most of the chapters have been updated and additional interest is focused on intracytoplasmic sperm injection ICSI in view of the risk of malformations in newborns This manual addresses the techniques of assisted reproduction that are available today Competent authors from various centers present in a concise way their tried and tested procedures so that the latter can be readily implemented Due to different legal regulations the scope of assisted reproduction is much more limited in Germany than in many other countries For example whereas only three embryos may be created and transferred in Germany such restrictions do not exist in several other European countries and the United States Furthermore heterologous fertilization oocyte donation and surrogate motherhood are banned in Germany
