Mazon, 2012-12-06 Award winning monograph of the Ferran Sunyer i Balaguer Prize 2003. This book contains a detailed mathematical analysis of the variational approach to image restoration based on the minimization of the total variation submitted to the constraints given by the image acquisition model. This model initially introduced by Rudin, Osher, and Fatemi had a strong influence in the development of variational methods for image denoising and restoration and pioneered the use of the BV model in image processing. After a full analysis of the model, the minimizing total variation flow is studied under different boundary conditions and its main qualitative properties are exhibited. In particular, several explicit solutions of the denoising problem are computed. **The Best 300 Business Schools, 2011 Edition**, 2010 Provides a detailed overview of the best business schools across North America including information on each school's academic program, competitiveness, financial aid, admissions requirements, and social scenes.
