employ people How South Africa Works concludes by offering an agenda and active steps for greater competitiveness for government business and labour      **Science Education and Curriculum in South Africa** Oscar Koopman,2016-11-01

This book explores the impact of the socio historical political and economic environment in South Africa both during and after Apartheid During this time the South African education system demonstrated an interest in a specific type of knowledge which Koopman refers to as a science of government This science of government leaves the learners with a blurred understanding of science that is disconnected from external nature and human nature and is presented as a series of abstract concepts and definitions The book also investigates the dialectical tensions between the science curriculum and the role of the teacher as an active implementer of the curriculum The book draws on the work of various phenomenological scholars namely Edmund Husserl Martin Heidegger Merleau Ponty and Max van Manen to discuss these tensions      **South African Labour Bulletin** ,2004      **ICT Education** Richard J.
