Autonomous Road Vehicle Path Planning and Tracking Control Levent Guvenc,Bilin Aksun-Guvenc,Sheng Zhu,Sukru Yaren Gelbal,2021-12-29 Discover the latest research in path planning and robust path tracking control In Autonomous Road Vehicle Path Planning and Tracking Control a team of

distinguished researchers delivers a practical and insightful exploration of how to design robust path tracking control. The authors include easy to understand concepts that are immediately applicable to the work of practicing control engineers and graduate students working in autonomous driving applications. Controller parameters are presented graphically and regions of guaranteed performance are simple to visualize and understand. The book discusses the limits of performance as well as hardware in the loop simulation and experimental results that are implementable in real time. Concepts of collision and avoidance are explained within the same framework and a strong focus on the robustness of the introduced tracking controllers is maintained throughout. In addition to a continuous treatment of complex planning and control in one relevant application, the Autonomous Road Vehicle Path Planning and Tracking Control includes a thorough introduction to path planning and robust path tracking control for autonomous road vehicles as well as a literature review with key papers and recent developments in the area. Comprehensive explorations of vehicle path and path tracking models, model in the loop simulation models and hardware in the loop models. Practical discussions of path generation and path modeling available in current literature. In depth examinations of collision free path planning and collision avoidance. Perfect for advanced undergraduate and graduate students with an interest in autonomous vehicles. Autonomous Road Vehicle Path Planning and Tracking Control is also an indispensable reference for practicing engineers working in autonomous driving technologies and the mobility groups and sections of automotive OEMs.

Advances in Human Aspects of Transportation Neville A. Stanton, Steven Landry, Giuseppe Di Bucchianico, Andrea Vallicelli, 2016-07-26. This book discusses the latest advances in research and development, design, operation and analysis of transportation systems and their complementary infrastructures. It reports on both theories and case studies on road and rail, aviation and maritime transportation. The book covers a wealth of topics from accident analysis, vehicle intelligent control and human error and safety issues to next generation transportation systems, model based design, methods, simulation and training techniques and many more. A special emphasis is given to smart technologies and automation in transport as well as to user centered ergonomic and sustainable design of transport systems. The book, which is based on the AHFE 2016 International Conference on Human Factors in Transportation held on July 27-31, 2016 in Walt Disney World, Florida, USA, mainly addresses transportation system designers, industrial designers, human computer interaction researchers, civil and control engineers as well as vehicle system engineers. Moreover, it represents a timely source of information for transportation policy makers and social scientists dealing with traffic safety management and sustainability issues in transport.
