Voice Leading David Huron, 2016-08-26 An accessible scientific explanation for the traditional rules of voice leading including an account of why listeners find some musical textures more pleasing than others Voice leading is the musical art of combining sounds over time In this book David Huron

offers an accessible account of the cognitive and perceptual foundations for this practice Drawing on decades of scientific research including his own award winning work Huron offers explanations for many practices and phenomena including the perceptual dominance of the highest voice chordal tone doubling direct octaves embellishing tones and the musical feeling of sounds leading somewhere Huron shows how traditional rules of voice leading align almost perfectly with modern scientific accounts of auditory perception He also reviews pertinent research establishing the role of learning and enculturation in auditory and musical perception Voice leading has long been taught with reference to Baroque chorale style part writing yet there exist many more musical styles and practices The traditional emphasis on Baroque part writing understandably leaves many musicians wondering why they are taught such an archaic and narrow practice in an age of stylistic diversity Huron explains how and why Baroque voice leading continues to warrant its central pedagogical status Expanding beyond choral style writing Huron shows how established perceptual principles can be used to compose analyze and critically understand any kind of acoustical texture from tune and accompaniment songs and symphonic orchestration to jazz combo arranging and abstract electroacoustic music Finally he offers a psychological explanation for why certain kinds of musical textures are more likely to be experienced by listeners as pleasing

Expanding the Canon Melissa Hoag, 2022-12-30 Directly addressing the underrepresentation of Black composers in core music curricula Expanding the Canon Black Composers in the Music Theory Classroom aims to both demonstrate why diversification is badly needed and help faculty expand their teaching with practical classroom oriented lesson plans that focus on teaching music theory with music by Black composers This collection of 21 chapters is loosely arranged to resemble a typical music theory curriculum with topics progressing from basic to advanced and moving from fundamentals diatonic harmony and chromatic harmony to form popular music and music of the twentieth and twenty first centuries Some chapters focus on segments of the traditional music theory sequence while others consider a single style or composer Contributors address both methods to incorporate the music of Black composers into familiar topics and ways to rethink and expand the purview of the music theory curriculum A foreword by Philip Ewell and an introductory narrative by Teresa L Reed describing her experiences as an African American student of music set the volume in wider context Incorporating a wide range of examples by composers across classical jazz and popular genres this book helps bring the rich and varied body of music by Black composers into the core of music theory pedagogy and offers a vital resource for all faculty teaching music theory and analysis
