Mutuality, Mystery, and Mentorship in Higher Education Mary Jo Hinsdale, 2015-03-17 This book is for higher education faculty and staff who wish to deepen their approach to mentoring all students but it is especially concerned with outsider students those who come from groups that were long excluded from higher education and who have been marginalized and minoritized by society and academia Mentoring is difficult work for an abundance of reasons and given higher education's troubled history of exclusion as well as a contemporary context fraught with social and power imbalances it can be especially challenging when the mentorship takes place across dimensions of difference such as social class race ethnicity sexuality gender or ability *Mutuality Mystery and Mentorship in Higher Education* examines the seemingly spontaneous and serendipitous connection between mentor and protégé and points to a new vision of mentorship based on a deep sense of reciprocity between the two Hinsdale proposes that if more mentors take a responsive decolonizing approach to their work across difference then the promise of social and class mobility through education might be realized for more of our students and the tide might begin to turn toward an increasingly inclusive intellectually open academy

Events and Sustainability Andrew Smith, Judith Mair, 2022-09-05 This book examines the links between events and sustainability with a particular focus on how festivals and events contribute to making places more inclusive resilient and sustainable Previous sustainability research in events often focused on reducing the negative environmental impacts with a corresponding lack of consideration of socio-economic dimensions More recently research has begun to consider events in relation to a range of economic and social issues highlighting the growing importance of examining events through a critical lens This book adopts a critical and broader approach to event sustainability arguing that scholars should examine how events might contribute to sustainable development rather than merely exploring how individual events could be made more sustainable Accordingly the contributors to this edited book address how events might change attitudes and behaviours by promoting sustainable

lifestyles communities and technologies Following a detailed introduction the book features 16 chapters written by scholars from across the world The chapters in this book were originally published as a special issue of the Journal of Sustainable Tourism
