Handbook of Research on Redesigning the Future of Internet Architectures Boucadair, Mohamed, Jacquenet, Christian, 2015-05-31

As the volume of global Internet traffic increases, the Internet is beginning to suffer from a broad spectrum of performance-degrading infrastructural limitations that threaten to jeopardize the continued growth of new innovative services. In answer to this challenge, computer scientists seek to maintain the original design principles of the Internet while allowing for a more dynamic approach to the manner in which networks are designed and operated. The Handbook of Research on Redesigning the Future of Internet Architectures covers some of the hottest topics currently being debated by the Internet community at large, including Internet governance, privacy issues, service delivery, automation, advanced networking schemes, and new approaches to Internet traffic forwarding and path computation mechanics. Targeting students, network engineers, and technical strategists, this book seeks to provide a broad and comprehensive look at the next wave of revolutionary ideas.
