Gaztambide-Fernández,2010-10-16 The gaze of educational researchers has traditionally been turned down toward the experiences of communities deemed at risk presumably with the purpose of improving their plight Indeed theorizing about the relationship between education culture and society has typically emerged from the study of poor and marginalized groups in public schools Seldom have educational researchers considered class privilege and educational advantage in their attempts at understanding inequality and fomenting social justice This collection of groundbreaking studies breaks with this tradition by shifting the gaze of inquiry up toward the experiences of privilege in educational environments characterized by wealth and the abundance of material resources This edited volume brings together established and emerging scholars in education and the social sciences working critically to interrogate a diversity of educational environments serving the interests of influential groups both within and beyond schools The authors investigate the power relations that underlie various contexts of class privilege They shed light into the ways in which the success of a few relates to the failure of many The American City Arthur Hastings Grant,Harold Sinley Bутtenheim,1925 *Legislative Document* New York (State). Korostelina,2021-10-21 This book explores the resilience in urban neighborhoods affected by chronic conflict and violence developing a new model for improving resilience policies The neighborhood resilience approach is an inclusive form of building positive resilience which recognizes that local communities possess valuable skills and experience of dealing with crises and prioritizes the agency of local communities in the production of knowledge and developing practices The book identifies and describes the repertoire of neighborhood resilience practices organized in four clusters 1 addressing the structure of conflict 2 increasing the effectiveness of external resources 3 enhancing the community capacities and 4 reflecting the dynamics of identity and power in neighborhoods One of the key findings of the book is the nonlinear connections between structure and dynamics of conflict and neighborhood resilience practices represented in the Four Loops

Model The concentration on community based practices addresses macro level critiques of neo liberalism in critical resilience studies and encourages rethinking the ways community based indicators might operate in combination with existing macro indicators of resilience The bottom up indicators provide more specific details and essential localized experiences for improving resilience policies at the national level This book will be of much interest to students of conflict resolution resilience urban studies and US politics *Index of Bicentennial Activities* American Revolution Bicentennial Administration, 1976
