What is Wreck Diving?

The term **Wreck Diving** denotes recreational and technical diving where the wreckage of ships, aircraft, and other man-made structures are explored. Professional divers conduct wreck dives to explore or find out down wreckage, salvage work, accident or investigation work, and archaeological surveys. A person who completed the Wreck Dive speciality program is eligible to explore underwater drowned wreckage. Most wreckage dive sites are shipwrecks, and there is an increasing trend to scuttle retired ships to create artificial shipwreck reefs.

It is a popular form of diving that requires a specialised set of equipment, training, skills, and experience. Artificial wreckage is the habitat of multiple species of marine life and presents new skill challenges for scuba divers. Shipwrecks are usually large structures with many exciting pieces of machinery, different rooms, personal items, and belongings left behind. Which has often exciting or tragic history.
