The Schedule Evaluation Tool (SET) was developed in response to these specific needs using a visual schedule. It helps people working with individuals with ASD or ID to determine the type of schedule best suited to their needs and abilities and to integrate it into their living environment, promoting independence and a better quality of life. The SET includes materials, protocols, and a manual that allow practitioners and professionals to assess the schedule of children, adolescents, and adults in various settings such as educational, daycare, school, internship, or employment, and residential settings. It is divided into four distinct parts. The first part involves the manipulation of objects, photographs, pictograms, and words in a formal assessment context. The second and third parts take place directly in the setting where the schedule is to

be implemented The fourth part is administered in the form of an interview with the person who knows the person best in the context where the schedule will be introduced Available formats hardcover trade paperback accessible PDF and accessible ePub
