2.7 How to change the margins and paper size

Usually the margins you're using will have the page margins and paper size set correctly for that version. For example, if you're using a journal article template provided by the journal publisher, that template will be formatted according to their requirements. In those cases, it's best not to alter the margins directly.

If however you're using a more general template, such as this one, and would like to alter the margins, a common way to do so is via the geometry package. You can find the geometry package listed in the preamble at the top of this template file, and if you'd like to learn more about how to adjust the margins, please visit the [help which is page size and margins](#).
