Lester Faigley employs his own advice to engage students in every step of the writing process for both college composition and everyday life and pulls back the curtain on how writers work. Aligned with the learning goals for a first year college writing course identified in the 2014 Outcomes Statement from the Council of Writing Program Administrators, *Writing A Guide for College and Beyond* gives students the support they need to succeed in first year composition in their other courses and in their careers. In the 4th Edition, students can also practice and explore what they've learned chapter by chapter with interactive MyWritingLab tools, assignments, and projects. The 8th Edition introduces sweeping changes to the philosophy and details of MLA works cited entries. Responding to the increasing mobility of texts, MLA now encourages writers to focus on the process of crafting the citation, beginning with the same questions for any source. These changes then align with current best practices in the teaching of writing, which privilege inquiry and critical thinking over rote recall and rule following.
