A Student's Guide to Wuthering Heights by Emily Brontë Richard E. Mezo, 2002 A Student's Guide to Wuthering Heights by Emily Bronte is a general introduction to one of the great English novels of the nineteenth century Misunderstood by most critics and commentators upon its publication in 1847 the story of Catherine and Heathcliff and their peers and descendants slowly became recognized as the work of a genius and is now on nearly every list of recommended books for both high school and college students However many students today find the novel difficult to read and understand because of its language and its setting especially challenging to some are the sections in which characters speak in the Yorkshire dialect This guide provides an easy to use glossary of that dialect and translations of the dialogue It also includes discussions of the social economic and political background of the period the last part of the eighteenth and the first part of the nineteenth centuries Combined with a thorough coverage of language and background this guide offers a list of questions about the reading that are intended to lead the students to independent thinking about the work Unlike some better known guides this text contains no detailed summary of parts of the novel Students must read chapters of the novel itself in order to answer the questions In a few instances readers must go outside Wuthering Heights to answer a question that is some basic research is required In addition the appendices contain materials intended to enrich the novel and to deepen the appreciation of each student for this outstanding work It is the desire of the author to make Wuthering Heights more readily accessible to students and at the same time to challenge them to engage in independent critical reading

Reading and the Making of Time in the Eighteenth Century Christina Lupton, 2018-08-15. How did eighteenth century readers find and make time to read? Books have always posed a problem of time for readers. Becoming widely available in the eighteenth century when working hours increased and lighter and quicker forms of reading (newspapers, magazines, broadsheets) surged in popularity, the material form of the codex book invited readers to situate themselves creatively in time. Drawing on letters, diaries, reading logs and a range of eighteenth and early nineteenth century novels, Christina Lupton's *Reading and the Making of Time in the Eighteenth Century* concretely describes how book readers of the past carved up, expanded and anticipated time. Placing canonical works by Elizabeth Inchbald, Henry Fielding, Amelia Opie and Samuel Richardson alongside those of lesser known authors and readers, Lupton approaches books as objects that are good at attracting particular forms of attention and paths of return. In contrast to the digital interfaces of our own moment and the ephemeral newspapers and pamphlets read in the 1700s, books are rarely seen as shaping or keeping modern time. However, as Lupton demonstrates, books are often put down and picked up; they are leafed through as well as read sequentially, and they are handed on as objects designed to bridge temporal distances. In showing how discourse itself engages with these material practices, Lupton argues that reading is something to be studied textually as well as historically. Applying modern theorists such as Niklas Luhmann, Bruno Latour and Bernard Stiegler, Lupton offers a rare phenomenological approach to the study of a concrete historical field. This compelling book stands out for the combination of archival research, smart theoretical inquiry and autobiographical reflection it brings into play.
