BOOK JACKET *The Idea of a Writing Laboratory* Neal Lerner, 2009-07-09

The Idea of a Writing Laboratory is a book about possibilities about teaching and learning to write in ways that can transform both teachers and students. Author Neal Lerner explores higher education's rich history of writing instruction in classrooms, writing centers, and science laboratories. By tracing the roots of writing and science educators' recognition that the method of the lab hands on student activity is essential to learning, Lerner offers the hope that the idea of a writing laboratory will be fully realized more than a century after both fields began the experiment. Beginning in the late nineteenth century, writing instructors and science teachers recognized that mass instruction was inadequate for a burgeoning non-traditional student population and that experimental or laboratory methods could prove to be more effective. Lerner traces the history of writing instruction via laboratory methods and examines its successes and failures through case studies of individual programs and larger reform initiatives. Contrasting the University of Minnesota General College Writing Laboratory with the Dartmouth College Writing Clinic, for example, Lerner offers a cautionary tale of the fine line between experimenting with teaching students to write and curing the students of the disease of bad writing. The history of writing within science education also winds its way through Lerner's engaging work, presenting the pedagogical origins of laboratory methods to offer educators in science, in addition to those in writing studies, possibilities for long-sought-after reform. The Idea of a Writing Laboratory compels readers and writers to don those white coats and safety glasses and discover what works and asserts that teaching writing as an experiment in what is possible as a way of offering meaning-making opportunities for students, no matter the subject matter, is an endeavor worth the struggle.

Help! I'm Teaching Middle School Science C. Jill Swango, Sally Boles Steward, 2003

Like your own personal survival guide, Help! I'm Teaching Middle School Science is a non-technical how-to manual, especially for first-year teachers. But even veteran teachers can benefit from the plentiful ideas, examples, and tips on teaching science the way middle schoolers learn best. The book covers all the basics, what to do on the first day of school, including icebreaker activities, preparing safe and effective lab lessons, managing the classroom, working with in-school teams, as well as parents. But its practical and encouraging approach doesn't mean it shortcuts the basics of effective pedagogy. You will learn how to handle cooperative learning and assessment, how to help students write effectively, and the importance of modeling for early adolescents.
