The term research is well-known to the logical world which plays an important role in finding the new problems and solutions, ideas, techniques, procedures, drugs, etc. Good use of research knowledge especially in writing is imperative to make it beneficial for larger community. In writing of knowledge, proper review of literature is very essential to gather research-problem-related information. Writer should follow the steps throughout collection of data during writing of review article. Review of literature increases clarity, reliability, uniformity and critical evaluation of evidence. This paper attempts to explain the guidelines and steps of review manuscript writing.

Keywords: Guidelines, Review, Characteristics

Introduction

Literature review is the most important aspect of research.¹ A review article is a critical analysis of the literature in a specific area of knowledge through outline, classification, comparison, etc.² A good review article requires briefing, analysing, and synthesizing the study that has been completed on a particular topic. It makes the data more accessible and convenient to publication of research.³ The foremost aim of a review paper is to examine the current status of the given topic as well as talk about the research methodologies and research-problem-related findings. A review text should enclose a complete list of references that are cited in the text.⁴ During writing of review paper, researcher should keep in mind about readers' approaches (i.e., professionals in specific research field, students or beginner research scholars, etc.).^{1,2}

Purpose of a review article

With the help of review article, researcher has to organize,

synthesize and evaluate the literature; in addition, to discover patterns and development in the literature and evaluate the research gaps and propose new research areas.²

Types of Review Article

Review (Overview) Article

There are two basic types of review articles: one is systematic, another is non-systematic. An advanced preparation of specific methodology of review paper is needed in systematic review. Non-systematic review may require a selection of a wide variety of topic-related technical outcome which reflects the expert experiences and interests of the writer.⁴

Critical Review

It analyses the potency as well as fault of a research article after studying the discussed research problem and scientific contents. The review should appropriately explain the

Sides, 2017-09-15 Thoroughly updated to discuss the use of tools such as Skype and social media this concise volume shows how effective communication via written text and spoken presentations can positively impact project management in professional environments Professional communications are the information product of all organizations and businesses Based on that premise this book offers communications strategies that will benefit any organization that disseminates technical information in house and or to customers The popular work provides easy to

understand and apply guidelines for designing and writing effective technical documents as well as other related communications. What makes this new edition especially valuable is that it maintains the quality of information that distinguished the previous editions but is now updated to encompass current technology and trends including today's prevalent communication tools such as social media. The book begins by looking at skills common to all technical writing and offering general advice on designing and writing reports. Next is a discussion of specific types of reports along with common problems and issues writers face. Finally, the work overviews other forms of communications such as professional presentations. The updated material also considers the growing importance of interviews and focus groups as information gathering tools, the influence of visual rhetoric, and the use of technologies such as Skype and webinars. **Oswaal ISC**

Goldman, Jaegwon Kim, 2013-03-09. This Festschrift seeks to honor three highly distinguished scholars in the Department of Philosophy, University of Michigan: William K. Frankena, Charles L. Stevenson, and Richard B. Brandt. Each has made significant contributions to the philosophic literature, particularly in the field of ethics. Michigan has been fortunate in having three such original and productive moral philosophers serving on its faculty simultaneously. Yet they stand in a long tradition of excellence both within the Department and in the University. Let us trace that tradition briefly. The University of Michigan opened in 1841. Its Department of Literature, Science, and the Arts at first resembled a typical American college of that period, with religious and ethical indoctrination playing a central role in course offerings. But when Henry Tappan, a Presbyterian clergyman and Professor of philosophy, became President in 1852, he succeeded in shifting the emphasis from indoctrination to inquiry and scholarship. Though he was dismissed for his policies in 1863, Tappan's efforts to establish a broad and liberal curriculum prevailed. Michigan was to take its place among the leading educational institutions in this country and to achieve an international reputation as a research center. Several past philosophers are worthy of mention here: George Sylvester Morris, an absolute idealist, joined the Department in 1881, having served from 1870 as Chairman of the Department of Modern Languages and Literature. He assumed the Chairmanship of Philosophy in 1884. *Advances in Databases and Information Systems* Silvia Chiusano, Tania Cerquitelli, Robert Wrembel, 2022-08-29.
