

How to Write a Critical Book Review

A book review is more than a book report or summary of a book's contents. A review is a critical essay evaluating the merits of an academic work. Its purpose is not to prove that you read the book—which is understood as a given—but to show that you can think critically about what you've read.

You can see examples of reviews in virtually any historical journal, and these may help you to write your own review. Reviews are a vital part of academic life, as you will see in the journals. Most professors regularly read and write reviews to find interesting books, stay informed of new work, and ensure that their voices continue to be heard.

A book review requires a lot of thought and effort. This handout will assist you. The process can be broken down into three main stages: as you read; as you prepare to write; and, as you write. With each stage there are a series of questions and factors to consider as you work on your review. Many of these issues are interrelated, but in this guide they are broken up to make them easier to understand.

STAGE ONE: AS YOU READ

You should consider the following issues while you are reading the book to help you better evaluate it. Make notes as you read, so you won't forget your observations or have to go back and hunt for references.

- a. Purpose/Thesis: What was the author's purpose in writing the book? Did she state her purpose explicitly or did you have to infer it? The purpose for writing is usually the thesis or argument of the work. (Although academics often write books to refute another scholar's work or because something is en vogue, the underlying purpose for writing is always to present an argument). Does the book have a clear central thesis/argument? To what extent and how effectively (i.e., with what kinds of evidence) is this thesis developed? Does the author convince you of the validity of her thesis/argument?
- b. Sources: What types of sources does the author utilize in presenting the thesis? Are they mainly published documents, or do they include archival records? Does the author draw on other material such as novels, artwork, or interviews? How are the author's sources incorporated into the narrative? Do you think she has tapped all the major sources available or are there omissions?
- c. Contextualization: How well does the author explain the wider context of the events or developments he is discussing? Is the book narrowly focused or does the author try to connect to wider developments?
- d. Style: Is the book well written? Is it easy to understand? Does it flow well? Is the writing dense and heavy with jargon, making it hard to grasp? Does the author show a flair for effective writing that goes beyond simple communication? Does the writing make the book more interesting?

Developing Creativity in the Classroom Todd Kettler, Kristen N. Lamb, Dianna R. Mullet, 2021-09-03. *Developing Creativity in the Classroom* applies the most current theory and research on creativity to support the design of teaching and learning. Creative thinking and problem solving are at the heart of learning and application as students prepare for innovation-driven careers. This text debunks myths about creativity and teaching and instead illustrates productive conceptions of creative thinking and innovation, including a constructivist learning approach in which creative thinking enhances and strengthens conceptual understanding of the curriculum. Through models of teaching that support creativity and problem solving, this book extends the idea of a creative pedagogy to the four core curriculum domains. *Developing Creativity in the Classroom* focuses on explanations and examples of how creative thinking and deep learning merge to support engaging learning environments rising to the challenge of developing 21st-century competencies.
