Attachment of Assets Lawrence W. Newman,2014-03-01 Practitioners from leading firms in over 90 countries provide practical information about procedural and substantive issues regarding attachment of assets Because the availability of attachments in advance of judgments can make the difference between success and failure in a lawsuit for money damages and because attachments may often be obtained in places far removed from the venues of proceedings on the merits it is important for litigation counsel to be aware of the potential for multi jurisdictional assaults on the assets of their clients or of their clients adversaries Attachment of Assets is designed to give practical information and guidance to lawyers and businessmen who are interested in securing expected future judgments

and in making strategic decisions concerning the deployment of moveable assets in the face of possible attachments of them. The chapters each discussing the requirements of a separate country are written by lawyers with practical expertise in this field. The procedure by which attachments are obtained vary ranging from court orders authorizing a court official to take custody of a defendant's assets to orders restraining the defendant from transferring his assets. The effects of such orders differ as well some create a lien superior to those of other creditors and others do no more than immobilize the debtor's assets leaving them open to being levied upon by later arriving judgment creditors. Countries vary in the ways in which they permit attachments to be carried out whether for example all of the banks in a given city may be served with attachment notices or orders. They vary as well with respect to the information that is imparted to the attaching creditor after attachment orders have been served. Some rules make available to creditor information concerning the value of assets on which they have successfully levied while others leave creditors in the dark or dependent on informal hints from garnishees as to whether or not pay dirt has been struck. Most importantly jurisdictional requirements for the issuance of attachment orders are not similar. Some countries permit attachments only if the defendant is subject to the jurisdiction of their courts with respect to the merits of the case. Others are less demanding permitting attachments solely on the basis and to the extent of the presence of the assets successfully attached. It is probably fair to say that in many foreign jurisdictions the protection of creditors through fraudulent conveyance laws and the like is inadequate or even as a practical matter unavailable. The enforcement of judgments is therefore often dependent on a creditor's ability to obtain early even prior to the commencement of a lawsuit a prejudgment attachment or the equivalent of his debtor's assets. The extent to which attachments are obtainable in various countries of the world and the basis under which they may be obtained under local law are the focus of Attachment of Assets Format of Publication Organized in a uniform question and answer format that addresses the receptiveness of each country toward the attachment of assets the procedural requirements for filing for attachment reciprocity treaty provisions and defenses. Every Chapter is organized with the same special three part arrangement allowing you to quickly and easily locate the information you need for each country. Part I contains a survey of the current attitude of each country's courts and government toward the attachment of assets including anticipated changes and recent cases. Part II discusses procedure the judgment creditor must follow to file for the attachment of assets in the other country including translation of the judgment currency conversion attorneys fees and recovery of interest. Part III summarizes the requirements the judgment creditor must meet for attachment and the defense the judgment and the defenses the judgment debtor must establish to prevent attachment.

Assessment for Experiential Learning Cecilia Ka Yuk Chan, 2022-09-29 Chan's book explores the challenges in assessing experiential learning deepens our understanding and inspires readers to think critically about the purpose of assessment in experiential learning. Experiential learning has been studied and proven to be effective for student learning particularly for the development of holistic competencies i.e. 21st

century skills soft skills transferable skills considered essential for individuals to succeed in the increasingly global and technology infused 21st century society Universities around the world are now actively organising experiential learning activities or programmes for students to gain enriching and diversified learning experiences however the assessment of these programmes tends to be limited unclear and contested Assessment plays a central role in education policies and students approach to learning But do educators know how to assess less traditional learning such as service learning entrepreneurship cross discipline or cross cultural projects internships and student exchanges While the current assessment landscape is replete with assessments that measure knowledge of core content areas such as mathematics law languages science and social studies there is a lack of assessments and research that focus on holistic competencies How do we assess students ability to think critically problem solve adapt self manage and collaborate Central to the discussion in this book is the reason students are assessed and how they should be assessed to bring out their best learning outcomes Offering a collection of best assessment practice employed by teachers around the world this volume brings together both theoretical and empirical research that underpins assessment and perceptions of different stakeholders understanding of assessment in experiential learning from students teachers and policymakers The idea of assessment literacy also plays an important role in experiential learning for example reflection is often used in assessing students in experiential learning but how reflection literate are educators are they aware of the ethical dilemmas that arise in assessing students These questions are discussed in detail The volume also introduces a quality assurance programme to recognise student development within experiential learning programmes The book will be particularly informative to academic developers teachers students and community partners who struggle with the development and assessment for experiential learning those who plan to apply for funding in experiential learning and policymakers and senior managements seeking evidence and advice on fine tuning curricular assessment designs and quality assurance The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
