Money in One Lesson Gavin Jackson,2022-01-20 Superb Tim Harford author of How to Make the World Add Up Money is essential to the economy and how we live our lives yet is inherently worthless We can use it to build a home or send us to space and it can lead to the rise and fall of empires Few innovations have had such a huge impact on the development of humanity but money is a shared fiction a story we believe in so long as others act as if it is true Money is rarely out of the headlines from the invention of cryptocurrencies to the problem of high inflation extraordinary interventions by central banks and the power the West has over the worldwide banking system In Money in One Lesson Gavin Jackson answers the most important questions on what money is and how it shapes our world drawing on vivid examples from throughout history to demystify and show how societies and its citizens both past and present are always entwined with matters of money A highly illuminating well researched and beautifully written book on one of humanity s most important innovations Martin Wolf chief economics commentator Financial Times

Postmonolingual Critical Thinking Michael Singh,Si Yi Lu,2020-04-07 Maintaining English as the sole language of knowledge production and dissemination in universities that enrol students who speak multiple languages and those students learning other languages is questionable This groundbreaking work calls into question the exclusive use of academic English in internationalising higher education teaching and research By interrogating the dominant assumptions informing the monolingual mindset Postmonolingual Critical Thinking indicates that academically literate students can capably use their repertoires of languages and knowledge for educational purposes The case for students languages and knowledge having a place in English medium universities is made through evidence of the uses of Zh ngw n academic Chinese Proposing to broaden the scope of languages used for knowledge production and dissemination this book highlights the educational potential of multilingualism Postmonolingual Critical Thinking makes a unique proposal that universities which recruit doctoral students from Asia create education policy practices that enable them to extend their multilingual capabilities Arguing that by drawing on intellectual

resources from their various languages students construct knowledge of critical thinking in complex interesting and potentially innovative ways this book guides higher education institutions in putting this into practice It outlines a pragmatic approach for universities to explore the potential of multipolar multilingual education while being attentive to the tensions posed by assertions of a monolingual mindset Postmonolingual Critical Thinking has the potential to create great change in a higher education sector which is mired by a monolingual approach to graduate training This unique and thought provoking book is essential reading for those in the fields of applied linguistics comparative education higher education international studies teacher education and translation studies
