

IMPORTANT

HOT BLENDING INSTRUCTIONS

To minimize the possibility of scalding when blending hot materials, the following precautions and procedures must be observed:

- 1) If you are using the standard two-piece container lid that originally came with your blender, limit the amount of material processed to 1/2 pint.

NOTE: A special accessory lid assembly is available for use with **stainless steel containers only**, which allows safe processing of larger loads.

Order 1-Quart Hot Blending Lid, Catalog No. CAC14.

- 2) If you are using the **standard two-piece container lid**, **completely remove the center portion of the lid** before turning blender on. This will allow venting of the rapidly heated and expanding air present inside container when blender is running.

If you are using the **special accessory lid**, follow the instructions packed with the lid; venting will be accomplished automatically.

- 3) Always start blending on lowest speed setting, then progress to desired speed.
- 4) Never stand directly over blender when it is being started or while running.
