2025 Virginia Gray Book Award APSA Section 22 State Politics and Policy Legislatures are ubiquitous in the American political experience First created in Virginia in 1619 they have existed continuously ever since Indeed they were established in even the most unlikely of places notably in sparsely populated frontier settlements and functioned as the focal point of every governing system devised Despite the ubiquity of state legislatures we know remarkably little about how Americans have viewed them as organizations in terms of their structures rules and procedures But with the rise of modern public opinion surveys in the twentieth century we now have extensive data on how Americans have gauged legislative performance throughout the many years That said the responses to the questions pollsters typically pose reflect partisanship policy and personality Generally respondents respond favorably to legislatures controlled by their own political party and those in power during good economic times Incumbent lawmakers get ratings boosts from having personalities home styles that mesh with those of their constituents These relationships are important indicators of people s thoughts regarding the current performance of their legislatures and legislators but they tell us nothing about attitudes toward the institution and its organizational characteristics This study offers a unique perspective on what American voters have historically thought about legislatures as organizations and legislators as representatives Rather than focusing on responses to surveys that ask respondents how they rate the current performance of lawmakers and legislatures this study leverages the most significant difference between national and state politics the existence of ballot propositions in the latter At the national level Americans have never had any say over Congress s structure rules or procedures In contrast at the state level they have had ample opportunities over the course of more than two centuries to shape their state legislatures The data examined here look at how people have voted on more than 1 500 state ballot propositions targeting a wide array of legislative organizational and parliamentary features By linking the votes on these measures with the public debates preceding them this study documents not only how Americans viewed various aspects of their legislatures but also whether their opinions held constant or shifted over time The findings reported paint a more nuanced picture of Americans attitudes toward legislatures than the prevailing one derived from survey research When presented with legislative reform measures on which concrete choices were offered and decisions on them had to be made the analyses presented here reveal that counter to the conventional wisdom that people loved their representatives but hated the legislature voters usually took charitable positions toward the institution while harboring skeptical attitudes about lawmakers motives and behaviors

Protecting the right to vote United States. Congress. House. Committee on the Judiciary,2007 *Financing the 1996 Election* John Clifford Green,2016-07-01 First Published in 1999 The 1996 elections revealed that unmistakable dramatic changes have occurred in the way federal campaigns are paid for Through soft money donations issue advocacy campaigns and other stratagems parties and candidates have been able to circumvent the regulations put in place after the Watergate scandal Despite rhetorical condemnations there is every reason to expect these trends to continue in the future This study of the 1996 election the

latest in a highly praised series sponsored by the Citizens Research Foundation systematically examines the new campaign finance practices and their consequences **Roads to Dominion** Sara Diamond,1995-09-08 Diamond looks at conservative politics in the United States from World War II to the post Reagan years *Electronic Voting* Robert Krimmer,Melanie Volkamer,David Duenas-Cid,Peter Rønne,Micha Germann,2022-09-02 This open access book LNCS 13353 constitutes the proceedings of the 7th International Conference on Electronic Voting E Vote ID 2022 held in Bregenz Austria in October 2022 The 10 full papers presented were carefully reviewed and selected from 39 submissions The conference collected the most relevant debates on the development of Electronic Voting from aspects relating to security and usability through to practical experiences and applications of voting systems also including legal social or political aspects amongst others

The Promise Keepers Dane S. Claussen,2000 Now nearly 15 years old during which time it exploded in size then declined and has now plateaued the Promise Keepers and its policies have invited reactions ranging from celebration to suspicion Many see the Christian men s organization as a powerful tool to encourage and equip Christian men to face a morally complex future Others view the group as sexist or even heretical This book was the first and in most ways still the only objective analysis of the Promise Keepers and the many reactions to it Contributors to this collection of critical essays hail from the fields of political science history sociology religion and theology journalism and mass communication speech English women s studies American studies and sports science The responses range from supportive to skeptical and cover topics that go beyond the Promise Keepers to issues of evangelical Christianity gender roles men s organizations mass media and social movements
