Warships of the Soviet Fleets 1939-1945 Przemyslaw Budzbon, Jan Radziemski, Marek Twardowski, 2022-10-30 Seventy five years after the end of the Second World War the details of Soviet ships their activities and fates remain an enigma to the West In wartime such information was classified and after a brief period of glasnost openness the Russian state has again restricted access to historical archives Therefore the value and originality of this work is difficult to exaggerate It sees the first publication of reliable data on both the seagoing fleets and riverine flotillas of the Soviet Navy listing over 6200 vessels from battleships to river gunboats and mercantile conversions as well as purpose built warships Divided into three volumes this first covers major surface warships down to MTBs and armored gunboats as well as submarines For every class there is a design history analyzing strategic tactical and technical considerations and individual ship detail includes construction yard key building dates commissioning fleet designations relocations and ultimate fate Once a closely guarded secret the wartime loss of every ship and boat over 1000 is described Furthermore the confusion caused by frequent name changes is clarified by indexes that run to 16 000 items By following the ships through both their wartime and earlier history the book reveals many aspects of Russian history that remain highly sensitive clandestine co operation with Weimar Germany and fascist Italy the NKVD enforced closure of Soviet borders the Gulag Fleet the faked Metallist sinking that excused the military occupation of Estonia and the ill conceived pact with Nazi Germany Restrictions recently imposed on historical publications in Russia mean this book could certainly not have been published there as proven by the fact that most of the authors Russian collaborators preferred not to disclose their identities This is undoubtedly one of the most important naval reference works of

recent years and will be welcomed by anyone with an interest in warships the Soviet Navy or wider maritime aspects of the Second World War

The Fold Series Books 1-3 Nick Adams, 2021-01-29 This needs to be picked up by Netflix and made into a TV show Absolutely brilliant Goodreads In the vein of great writers like Harry Harrison and Robert A Heinlein Amazon Nick Adams is a storyteller of rare ability Goodreads I read a lot of sci fi and this is in the top percent Amazon Superb writing editing and excellent storytelling Kobo The best sci fi series I have read in a while Amazon The Initial Fold Book 1 What would you do if you materialised inside an alien starship It's 2049 and NASA sponsored physicist Edward Virr is on the cusp of man's greatest breakthrough the ability to fold space and travel faster than light He personally tests NASA's futuristic prototype fold ship with a hand picked crew But as disaster strikes the first mission Ed begins to suspect that he isn't the only one developing the new technology Discovering there's a lot more at stake than first contact Ed soon realises that Earth's very survival depends on his ability to solve a crime of galactic proportions Join Edward Virr and his rag tag crew as they undertake their first space adventure into the depths of the Milky Way The Andromedan Fold Book 2 The crew of your starship are being systematically slaughtered What do you do The galaxies ruling council have lost two ships thousands of light years distant on the outer fringe of the Milky Way A civilian exploration vessel and the military ship sent to find it have disappeared without a trace Edward Virr and the crew of the sentient starship Gabriel are tasked with a mission to discover what happened They find not only the two misplaced ships but a secret to intergalactic travel the biggest invasion fleet ever assembled and a ruling alien race so cruel it could end all of humankind Join Ed and company for their second crusade into the depths of uncharted space Only this time the team are alone two and a half million light years from home they're being hunted and nothing it seems goes to plan The Messier Fold Book 3 To protect your family's secrets how many people would you murder Planet Earth's first maximum security jail break involving a cloaked spacecraft necessitates Edward Virr and the crew of the sentient starship Gabriel to give chase Emboldened by the addition of Andrew's father a retired FBI investigator they pursue their quarry over 250 million light years through a recently discovered galactic gateway and find themselves immediately fighting for survival Two races at war for millennia over lust for power and greed don't take kindly to strangers appearing in their midst and push our heroes' abilities so far it culminates in an unspeakable tragedy Meanwhile their quarry have problems of their own The Fold Series The Initial Fold The Andromedan Fold The Messier Fold The Cygnus Fold The Acheron Fold The Medusa Fold The Halo Fold Author Note For the benefit of my awesome fans across

the pond this novel is written in UK English and may include a few colloquialisms and spellings that you don't recognise. There is understandably considering the circumstances a bit of swearing involved. We do swear a bit in England just put it down to eccentricity or maybe our spirited Anglo-Saxon heritage. Another unusual trait of the Brits is to use humour in stressful situations. Just ask anyone who's been on active service with the British Armed Forces. It helps to keep one sane. Now you're all prepared I hope you enjoy the yarns. Cheers for now Nick Adams

British Aircraft Carriers, Volume 1 Robert Brown, 2025-11-04 Several pages of plan drawings are provided and there is also a very nice section on the varied camouflage schemes carried by these ships. Modeling Madness Com The ShipCraft series provides in-depth information about building and modifying model kits of popular warship types. Lavishly illustrated each book takes the modeller through a brief history of the subject highlighting differences between ships and changes in their appearance over their careers. This includes paint schemes and camouflage featuring color profiles and highly detailed line drawings and scale plans. The modelling section reviews the strengths and weaknesses of available kits, lists commercial accessory sets for super-detailing of the subjects and provides hints on modifying and improving the basic kit. This is followed by an extensive photographic gallery of selected high-quality models in a variety of scales and the book concludes with a section on research references, books, monographs, large-scale plans and relevant websites. The subject of this volume is the evolution of the Royal Navy's fleet carriers as exemplified by those designed from the keel up for the role. Hermes was the world's first purpose-built carrier laid down in 1918 but she was followed by a series of conversions from other types and it was not until the mid-1930s that another was designed and built from scratch. This was the famous Ark Royal, a far larger and more capable ship but destined to be a one-off as the Navy switched its focus to a ship capable of surviving in the most hostile environments. This requirement produced the radically different armored carriers of the Illustrious class, arguably the toughest aviation ships of the Second World War. With its unparalleled level of visual information, paint schemes, models, line drawings and photographs, this book is simply the best.
