and improve competitiveness To improve sourcing decisions the concept of the Strategic Business Unit or SBU is applied to each source being considered to provide the company with goods and services Following the SBU approach similar product and service lines are grouped together in the corporation As a result quality levels delivery performance customer service and product advancements as well as costs are more easily measured and improved Just as the focus on these five criteria leads to improved SBU performance the same approach can be applied to enhance the performance of the individual sources of goods and services This is accomplished by similarly quantifying and improving the quality delivery cost customer service and product advancement performance of the companies sources whether outside suppliers or in house functions
