Cobb, 2007-09-26 On a remote island in the Canadian Arctic researchers discover the wreckage of a mysterious World War II era aircraft a discovery that forces the Russian Federation into a shocking admission The unmarked plane is a Soviet strategic bomber that disappeared with its crew more than fifty years ago while carrying two metric tons of weaponized anthrax Desperate to prevent a political and diplomatic firestorm the U S president dispatches a Covert One team led by Lieutenant Colonel Jon Smith to the crash site But others have reached the frigid windswept island first including an international arms dealer and his crew of vicious mercenaries As for the Russians they are lying a second even deadlier secret rests within the hulk of the lost bomber a secret the Russians are willing to kill to protect Trapped in a polar wilderness Smith and his team find themselves fighting a savage war on two front against an enemy they can see and another hiding within their own ranks *TM 5-5420-280-10* Delene Kvasnicka, TM 5 5420 280 10 **Weapons Acquisition: DoD Should Strengthen Policies for Assessing Technical Data Needs to Support Weapon Systems**, 2006 Army and the Air Force have encountered limitations in their sustainment plans for some fielded weapon systems because they lacked needed technical data rights The lack of technical data rights has limited the services flexibility to make changes to sustainment plans that are aimed at achieving cost savings and meeting legislative requirements regarding depot maintenance capabilities During our review we identified seven Army and Air Force weapon system programs where these military services encountered limitations in implementing revisions to sustainment plans C 17 aircraft F 22 aircraft C 130J aircraft Up armored High Mobility Multipurpose Wheeled Vehicle HMMWV Stryker family of vehicles Airborne Warning and Control System AWACS aircraft and M4 carbine Although the circumstances surrounding each case were unique earlier decisions made on technical data rights during system acquisition were cited as a primary reason for the limitations subsequently encountered As a result of the limitations encountered due to the lack of technical data rights the services had to alter their

plans for developing maintenance capability at public depots new sources of supply to increase production or competitive offers for the acquisition of spare parts and components to reduce sustainment costs For example the Air Force identified a need to develop a capability to perform maintenance on the C 17 at government depots but lacked the requisite technical data rights Consequently the Air Force is seeking to form partnerships with C 17 subvendors to develop its depot maintenance capability Its efforts to form these partnerships have had mixed results according to Air Force officials because some sub vendors have declined to provide the needed technical data Infantry ,2012 *Strykers* John Hamilton,2011-08-15 Readers will almost feel the ground rumble beneath their feet when they open this action packed book about the powerful Stryker They will learn the history of the Stryker and its different versions as well as Stryker specifications including size and weight top speed armament and cost Also described are the roles of Stryker crewmembers the driver and the vehicle commander Protective features mobility armament and engine power are discussed as well as the future of the Stryker Easy to read text interesting facts and quotes and oversized full color photographs draw in reluctant readers leaving them with a deeper understanding of this mighty military vehicle Features include a table of contents a glossary and an index A D Xtreme is an imprint of Abdo Publishing a division of ABDO Scientific and Technical Aerospace Reports ,1985 *Strykers* Carlos Alvarez,2011-01-01 Named after two soldiers who won the Medal of Honor the Stryker is an armored combat vehicle that serves many roles in the United States Army Strykers can carry troops guns and missiles They can also work as ambulances fire trucks and reconnaissance vehicles Discover why the Stryker is going to be a mainstay in the Army for many years **Surrogates for Future Force Warrior (FFW)** ,2005 This report describes the design organization and capabilities of a new U S Army Research Institute for the Behavioral and Social Sciences ARI Warfighting Experimentation Lab at Fort Benning Georgia It was developed to provide the ARI staff with a reach forward ability in training research As the DoD Training Transformation T2 gets underway the Army is now working on its transformation as an ongoing perpetual function Because of the flux inherent in perpetual transformation many of its proposed future developments are and will continue to be abstract with varying kinds and amounts of related empirical data Thus there was a need for the Warfighting Experimentation Lab to provide a flexible simulation environment in which researchers can examine proposed and evolving tactical technologies and innovations A major design consideration for the ARI facility was to mirror the equipment in the Infantry School s own Simulation Center using parallel surrogate equipment Stinet **Transformation of the 2nd Brigade, 25th Infantry Division (L) to a Stryker Brigade Combat Team in Hawai'i** ,2004 **Computer Gaming World** ,2004 **Current Catalog** National Library of Medicine (U.S.),1970 First multi year cumulation covers six years 1965 70 **The Army Communicator** ,2004 **Applying a Multi-skilled Soldier (MSS) Concept to the Stryker Brigade Combat Team (SBCT)** John T. Nelsen,2003 The general purpose of this study was to deepen and broaden thinking about the nature and implications of possible Multi Skilled Soldier MSS Concept

implementation Specific objectives were 1 to determine applicability of the MSS to the Stryker Brigade Combat Team SBCT as it might be implemented in Initial Entry Training IET and 2 to prototype MSS Concept implementation for the SBCT considering possible implementation for the Future Force The report also defines the MSS shows how the MSS Concept might fit conceptually within a larger Army training education and professional development model for Soldiers of all ranks offers an MSS Program design for IET and crafts actionable recommendations regarding general MSS implementation for IET The study concludes that the MSS Concept is fully applicable to the SBCT as well as the so called Current Force It also concludes that MSS implementation would have a significant salutary effect on unit training readiness postures across the force This study relied heavily on insights and analysis gained from interviews with groups of senior NCOs and officers within the 3rd Brigade SBCT 2nd Infantry Division Ft Lewis WA during September 2002
