FAIREY SWORDFISH MKS. I-IV

Swordfish Flight Manual

Harry Couch Theobald

Swordfish Flight Manual:

The USS Swordfish George J. Billy, 2019-10-23 Among the more than 260 American submarines that patrolled the Pacific during World War II the USS Swordfish in 1941 was the first to sink a Japanese armed merchant ship marking the beginning of the submarine's colorful history. A series of seven commanders led Swordfish's 13 war patrols. Each skipper had a distinct leadership style. Some were successful in sinking enemy ships; others returned to port empty handed. Yet all patrols risked dangerously close encounters with the enemy and the unforgiving nature of the open sea. Drawing on archival sources and interviews with veteran sailors, this first full length history of the Swordfish provides detailed accounts of each patrol and covers the mysterious disappearance of the legendary submarine on its final mission. *The Man Who Built the Swordfish* Adrian Smith, 2018-04-30 Sir Richard Fairey was one of the great aviation innovators of the twentieth century. His career as a plane maker stretched from the Edwardian period to the jet age; he lived long enough to see one of his aircraft be the first to break the 1000mph barrier and at least one of his designs, the Swordfish, holds iconic status. A qualified engineer, party to the design, development and construction of the Royal Navy's state of the art sea planes, Sir Richard founded Fairey Aviation at the Admiralty's behest in 1915. His company survived post war retrenchment to become one of Britain's largest aircraft manufacturers. The firm built a succession of front line aircraft for the RAF and the Fleet Air Arm including the iconic Swordfish. In addition, Fairey Aviation designed and built several cutting edge experimental aircraft including long distance record breakers between the wars and the stunningly beautiful Delta 2 which broke the world speed record on the eve of Sir Richard's death in 1956. Fairey also came to hold a privileged position in the British elite, courting politicians and policymakers. He became a figurehead of the British aviation industry and his successful running of the British Air Commission earned him a knighthood. A key player at a pivotal moment, Fairey's life tells us much about the exercise of power in early twentieth century Britain and provides an insight into the nature of the British aviation manufacturing industry at its wartime peak and on the cusp of its twilight years. **FM 30- 30 Aircraft Recognition Manual Supplement No. 6** United States. Department of the Army, 2018-09-29 FM 30- 30 Aircraft Recognition Manual Supplement No 6 1956 12 The Aircraft Recognition Manual covering air craft of the United States and Foreign Countries contains recognition information available on an unclassified basis. *Radar at Sea* Derek Howse, 1993-02-09 This book tells in non technical language how the British Navy contributed to the development of naval radar in World War 2. Addressed to the general reader, it tells not only the technical story in simple terms but also of the operational use of shipborne radar at sea for warning, for fire control, for fighter direction, for navigation in all theatres of war and particularly about the people who designed and fitted the equipment and those who used it at sea. **Fairey Swordfish 1934 to 1945 (all marks)** Jim Humberstone, 2014-07-17 Affectionately known as the Stringbag by its crews, the Fairey Swordfish biplane torpedo bomber was obsolete by 1939 but it still achieved some spectacular successes during the Second World War including the famous crippling of the German

battleship Bismarck in 1941 The centrepiece of this manual is Swordfish Mk II LS326 operated by the Royal Navy Historic Flight from RNAS Yeovilton The author and Haynes have been given unique access to this rare aircraft which is one of only two airworthy examples in the world

Luck of the Devil Robert le Page,2012-02-02 Robert le Page flew with the Fleet Air Arm from 1940 to 1945 mostly in 816 Squadron flying carrier based Fairey Swordfish He saw action mine laying off Cherbourg hunting U boats escorting convoys in the North Atlantic and Arctic seas and covering D Day Much of his early war years were aboard HMS Dasher and he was lucky to be ashore when the carrier mysteriously exploded and sank in the Clyde This decimated 816 Squadron which was eventually re equipped and then worked up to operational readiness to fly from HMS Tracker His story is full of insights into wartime naval flying For example when they were tasked with finding and attacking German E Boats they found that in a headwind these powerful boats could outdistance the Stringbag They devised a plan which was to glide as quietly as possible on their approach to the quarry and power up the engine only seconds before they attacked a plan that was unfortunately unsuccessful Once when landing in rough weather his aircraft was waved to go round again With throttle wide open the Swordfish struggled back into the air but alas the tailhook snagged the top wire of the barrier protecting other parked aircraft The author remembered staring down from the stalling aircraft to see a terror stricken fitter gazing up at him Fortunately all survived
