that can be used as homework or informal assessments and posters that reinforce each unit's theme and concept and generate discussion about respect, challenge, and teamwork. Part I of the book explores the issues surrounding teaching responsible behavior, how to create a positive environment, and how to assess student progress as well as your own. Part II lays out the unit plans for the three key areas of responsible behavior. Each unit contains a children's story that you can use to introduce a level Respect Challenge or Teamwork to your students. Each story uses a physical activity setting and is written specifically for physical education teachers as a tool to help them reach their learners. Each unit closes with a list of NASPE standards and sample performance outcomes that the unit addresses as well as child-friendly complementary I can statements. The book and CD-ROM package is set up as a toolkit to allow you to use all the units or choose the units that fit best with your program. Teaching Children Responsible Behavior is a flexible package that will help you better manage your classes, increase students' time on task, shape positive behavior among your students, and help them make responsible choices in and out of the classroom. Use it to create a culture of respect in your classroom.

Neural Networks for Identification, Prediction, and Control D. T. Pham, 1995. This publication describes examples of applications of neural networks in modelling prediction and control. Topics covered include identification of general linear and nonlinear processes, forecasting of river levels, stock market prices, currency exchange rates, and control of a time delayed plant and a two joint robot. The neural network types considered are the multilayer perceptron MLP, the Elman and Jordan networks, the Group Method of Data Handling GMDH, the cerebellar model articulation controller CMAC networks, and neuromorphic fuzzy logic systems. The algorithms presented are the standard backpropagation BP algorithm, the Widrow-Hoff learning dynamic BP, and evolutionary learning. Full listings of computer programs written in C for neural network based system identification and prediction to facilitate practical experimentation with neural network techniques are included.
