Savage Grace Jay Griffiths, 2015-03-17 Jay Griffiths is a tour guide for anyone who has ever wished to commune with the side of our human psyche that remains in touch with the wild. Equally at home among the sea gypsy Bajo people who live off the coast of Thailand and forage their food from the ocean floor drinking the psychedelic ayahuasca plant with Amazonian shamans or joining an Inuit whale hunt at the northern tip of Canada Griffiths takes readers on an adventure both charted and uncharted. She divides her meditations on these travels into sections named after the ancient elemental properties of the universe: Earth, Air, Fire, Ice, and Water because her subject matter is not merely the places traveled to but the depths of mind and the cultural narratives revealed by place. It is a universal story told of far-flung groups of humans with vastly different ways of life connected through the varied wilderness that sustains them. By describing the ways in which human societies and the human mind have developed in response to the wilder elements of our homelands, *Savage Grace* reveals itself as a benediction for the emotional, intellectual, and physical nourishment that people continue to draw from the natural world. Under the sway of Griffiths' charisma, her poetic prose, and her deeply learned and persuasive case for the wild roots of our shared human being, we learn that we are all each and every one of us a force of nature. **The Cumulative Book Index**, 1974

The Power of Stars Bryan E. Penprase, 2017-05-05 Completely revised and updated, this new edition provides a readable, beautifully illustrated journey through world cultures and the vibrant array of sky mythology, creation stories, models of the universe, temples, and skyscrapers that each culture has created to celebrate and respond to the power of the night sky. Sections on the archaeoastronomy of South Asia and South East Asia have been expanded with original photography and new research on temple alignments in Southern India and new material describing the astronomical practices of Indonesia, Malaysia, and other Southeast Asian countries. Beautiful photographs of temples in India and Asia have been added, as well as new diagrams explaining the alignment of these structures and the astronomical underpinnings of temples within the Pallava and Chola cultures. From new fieldwork in the Four Corners region of North America, Dr. Penprase has included accounts of Pueblo skywatching and photographs of ceremonial kivas that help elucidate the rich astronomical knowledge of the Pueblo people. The popular Archaeoastronomy of Skyscrapers section of the book has been updated, as well, with new interpretations of skyscrapers in Indonesia, Taiwan, and China. With the rapid pace of discovery in astronomy and astrophysics, entirely new perspectives are emerging about dark matter, inflation, and the future of the universe. *The Power of Stars* puts these discoveries in context and describes how they fit into the modern perspective of cosmology, which has arisen from the universal human response to the sky that has inspired both ancient and modern cultures. *School Library Journal*, 1986
