Pandemic influenza Great Britain: Parliament: House of Lords: Science and Technology Committee,2009-07-28 The original purpose of the inquiry was to revisit issues raised in the earlier report Pandemic Influenza 4th report session 2005 06 HL Paper 88 ISBN 9780104007723 published in December 2005 Whereas the initial focus was on the spread of the avian flu virus H5N1 as one of the most likely causes of the next pandemic the outbreak of swine flu in Mexico in March 2009 and its rapid global spread means the world is now in the midst of an H1N1 pandemic Following the swine flu outbreak the

Committee shifted the focus of attention to UK preparedness in terms of the Government's response to the emerging pandemic and subsequent events. The report commends the steps that the Government has taken to prepare for the pandemic. These include entering into advance purchase agreements which will enable the UK to purchase up to 132 million doses of pandemic specific vaccine sufficient for everybody in the UK when it becomes available, stockpiling antivirals to enable treatment of 50 per cent of the population, the Government's worst case scenario and ensuring that there are sufficient antiviral collection points to cover the population in each Primary Care Trust. The Committee has concerns about the longer term planning, the delay in operation of the National Pandemic Flu Service and critical care and surge capacity. The report also covers advice to high risk groups and recommends a national reference point for use by general practitioners from which they can request advice on the treatment of high risk groups.

Strategic Communication in a Global Crisis

Ralph Tench, Juan Meng, Angeles Moreno, 2022-10-20. This edited volume makes a unique and timely contribution by exploring in depth the topic of strategic communication and COVID 19 from a global perspective. It is widely agreed that effective and timely communication and leadership are crucial to the successful management of any pandemic. With the ongoing and possibly long lasting impact COVID 19 has had on many aspects of communication and multiple sectors of our societies it is critical to explore the role of strategic communication in change management during the COVID 19 pandemic and beyond. This book addresses such a need and is thoroughly grounded in rich empirical evidence gained through a global study of COVID 19 communication experiences and strategies. In the second half of 2020 a transnational team of senior researchers conducted research to investigate COVID 19 communications COM COVID 19 in different countries representing Europe, Africa, Latin America, North America, South America and Asia. The results presented in this book provide a compelling current picture of the COVID 19 pandemic and strategic communication globally. Chapters individually explore the national and regional experiences and discuss relevant successes and failures of pandemic communication and specific learning from the 2020-2021 crises. By emphasising the discussion on key communication channels, sources of information, facts and concerns as related to the COVID 19 pandemic, the editors call for actions to develop effective strategies within unique national contexts which can shed light on global expectations on necessary public health responses and communication. This book is written for scholars, educators and professionals in communication, public relations, strategic communication and corporate communication. It is also appropriate to use this book as a supplementary text for advanced undergraduate and graduate courses on relevant courses.

Global Spread of the Avian Flu Marilyn R. Bethe, 2006. Avian influenza or bird flu is a contagious disease of animals caused by viruses that normally infect only birds and less commonly pigs. Avian influenza viruses are highly species specific but have on rare occasions crossed the species barrier to infect humans. In domestic poultry infection with avian influenza viruses causes two main forms of disease distinguished by low and high extremes of virulence. The so called low pathogenic form commonly causes only mild symptoms, ruffled feathers, a drop in egg production.

and may easily go undetected The highly pathogenic form is far more dramatic It spreads very rapidly through poultry flocks causes disease affecting multiple internal organs and has a mortality that can approach 100% often within 48 hours A pandemic can start when three conditions have been met a new influenza virus subtype emerges it infects humans causing serious illness and it spreads easily and sustainably among humans The H5N1 virus amply meets the first two conditions it is a new virus for humans H5N1 viruses have never circulated widely among people and it has infected more than 100 humans killing over half of them No one will have immunity should an H5N1 like pandemic virus emerge All prerequisites for the start of a pandemic have therefore been met save one the establishment of efficient and sustained human to human transmission of the virus The risk that the H5N1 virus will acquire this ability will persist as long as opportunities for human infections occur These opportunities in turn will persist as long as the virus continues to circulate in birds and this situation could endure for some years to come

Everything Abridged Dennard Dayle, 2022-05-24 Incredibly entertaining and so damn illuminating Entertainment Weekly Dennard Dayle's electrifying and wholly original collection of satirical stories create a biting funny portrait of American racism capitalism and politics A New Yorker Best Book of the Year Slyly defiant and blazingly imaginative Dayle's a genre shattering writer whose wit and intellect never cease to entertain New York Times bestselling author Paul Beatty Framed as a reference work of humorous entries that offer trenchant social commentary Everything Abridged presages a dark vision of the near future but tells jokes in the face of it An intelligence agency operative uncovers a conspiracy to generate conspiracies and realizes his participation in the scheme A Caribbean monarch meets four decades of American presidents and adjusts his country's foreign policy accordingly Experiment participants are asked to bring back a gun as quickly as possible A copywriter on a space colony advertises a weapon with the potential to destroy his home during an intergalactic war These and other linked stories many of which feature a speculative bent about being Black in America law enforcement practices in an android society Olympic

speed walking consumerism nuclear war and more are interspersed with hilarious one line definitions for words ranging from abolition to zygote creating a sharply humorous portrait of American inequality With his singular wit sharp prose and shrewd observations Dennard Dayle captures the struggles his characters face to keep hold of their sanity in a society collapsing into chaos and absurdity

Evaluation of FAO/USAID Emerging Pandemic Threats Programme Phase II (EPT-2) Food and Agriculture Organization of the United Nations ,2021-03-05 The Food and Agriculture Organization of the United Nations FAO has been involved in the Emerging Pandemic Threats Programme EPT 2 funded by the United States Agency for International Development USAID since 2014 The programme sets out to minimize the impact of existing global pandemic threats and to detect respond to and improve the prevention of emerging threats Implementation of this programme at FAO has been carried out through 20 projects with efforts concentrated in 36 countries in Africa and Asia It builds upon lessons learned in the first phase of the programme in which FAO was involved in improving livestock disease surveillance enhancing capacity of veterinary epidemiologists and laboratories and improving response to the avian influenza EPT 2 focuses more in depth on preventative measures to zoonotic novel pathogens thereby reducing the risk of emergence of such diseases This evaluation aims to trace the contribution of FAO s interventions to the programme and assess its outcomes at the global regional and national levels EPT 2 has largely achieved its objectives and outputs in terms of technical capacity development and disease strategy but less so in terms of enabling policy value chains and production In line with FAO s 2011 One Health Action Plan FAO 2011 EPT 2 s technical focus has strengthened traditional partnerships between FAO and technical livestock departments and ministries and built stronger collaborations with health and environment ministries The next phase of the EPT 2 programme could take advantage of renewed national regional and global interest in ensuring that the COVID 19 experience is not repeated FAO needs to fully utilize its convening power partnerships trusted status and experience of emerging pandemic threats to engage political and business leaders on the need to consolidate and scale up EPT 2 induced gains to improve pandemic preparedness
