**Teaching and Learning Online** Franklin S. Allaire, Jennifer E. Killham, 2023-01-01 Science is unique among the disciplines since it is inherently hands on. However, the hands on nature of science instruction also makes it uniquely challenging when teaching in virtual environments. How do we as science teachers deliver high quality experiences to secondary students in an online environment that leads to age grade level appropriate science content knowledge and literacy but also collaborative experiences in the inquiry process and the nature of science? The expansion of online environments for education poses logistical and pedagogical challenges for early childhood and elementary science teachers and early learners. Despite digital media becoming more available and ubiquitous and increases in online spaces for teaching and learning, Killham et al 2014, Wong et al 2018, PreK-12 teachers consistently report feeling underprepared or overwhelmed by online learning environments. Molnar et al 2021, Seaman et al 2018. This is coupled with persistent challenges related to elementary teachers' lack of confidence and low science teaching self-efficacy. Brigido Borrachero Bermejo, Gunning Duran, 2004. Ideal for undergraduate teacher candidates, graduate students, teacher educators, classroom teachers, parents, and administrators, this book addresses why and how teachers use online environments to teach science content and work with elementary students through a research-based foundation. *Simulations and Student Learning* Matthew Schnurr, Anna MacLeod, 2021-01-04. George, Sergio Saleem Scatolini, Solomon Arulraj David, 2019-06-15. This collection of articles zooms in on different aspects of the presence and absence of the other in education, language, and history. **A comparative study of elite English-medium schools, public schools, and Islamic madaris in contemporary Pakistan** Akhtar Hassan Malik, 2015-04-12. This ethnographic study examines the role of differing school knowledge in reproducing various social classes in the society. It was observed that an unequal availability of capital resources, agents' class habitus, and the type of their cultural currency act as selection mechanisms that clearly favour some social groups over others. The ruling classes ensure the transfer of their power and privilege to their children by providing them with quality education in elite schools. The disadvantaged classes are excluded from these unique institutions by both social and economic sanctions. They have no other option than to educate their children either in public schools or Islamic madaris. As a result, inequitable educational opportunities consolidate the existing social class hierarchy. *Current Index to Journals in Education*, 1996.
