how it is working and how it improved the design process of box culverts in our tests This study shows that results obtained from this application are very close to the traditional design process and can be successfully used for designing of box culverts in India Also the study concludes that there is a significant amount of time saving in the design process when this application is used instead of traditional design process The electronic version of this dissertation is accessible from <http://hdl.handle.net/1969/1/155015>
