Environmental and Functional Engineering of Agricultural Buildings H. Barre, 2012-12-06 This book has been written as a textbook for students seeking a professional degree in agricultural engineering The authors believe that for students with this objective the course of study should be primarily analytical rather than descriptive and that the analytical approach should apply not only to ideas but also to quantitative procedures and computations We recognize that sound analysis particularly in applied fields is based on the understanding of theoretical principles and on knowledge of many practical considerations We have tried to maintain a good balance between the preparation of theory and practice but we favor emphasis of theoretical considerations on the basis that they usually are not mastered except in an organized course of study whereas practical knowledge is more easily assimilated To present both theory and practice makes heavy demands on class time and textbook space For this reason it has been possible to treat in detail only a few typical environmental systems for livestock housing and storing agricultural products as a means of illustrating methods of analysis and the application of principles It is presumed however that such study will prepare the student for work with other types of structures

Information Sources in Engineering Roderick A. Macleod, Jim Corlett, 2012-04-17 The current thoroughly revised and updated edition of this approved title evaluates information sources in the field of technology It provides the reader not only with information of primary and secondary sources but also analyses the details of information from all the important technical fields including environmental technology biotechnology aviation and defence nanotechnology industrial design material science security and health care in the workplace as well as aspects of the fields of chemistry electro technology and mechanical engineering The sources of information presented also contain publications available in printed and electronic form such as books journals electronic magazines technical reports dissertations scientific reports articles from conferences meetings and symposiums patents and patent information technical standards products electronic full text services abstract and indexing services bibliographies reviews internet sources reference works and publications of professional associations Information Sources in Engineering is aimed at librarians and
