Classics and Media Theory Pantelis Michelakis, 2020-04-09 Introducing a largely neglected area of existing interactions between Greco Roman antiquity and media theory this volume addresses the question of why interactions in this area matter and how they might be developed further It aims not only to promote awareness of the presence of the classics in media theory but also to encourage more media attentiveness among scholars of Greece and Rome By bringing together an international team of scholars with interdisciplinary expertise in areas ranging from classical literature and classical reception studies to art history media theory and media history film studies philosophy and cultural studies the volume as a whole engages with numerous aspects of classical Greece and Rome revolving around issues of philosophy cultural history literature aesthetics and epistemology Each chapter provides its own definition of what constitutes mediality and how it operates constructs different genealogies of the concept of the medium and engages with emergent fields within media studies that range from cultural techniques to media archaeology diagrammatology and intermediality By seeking to foreground the persistency of Greco Roman paradigms across the different strands of media theory the volume persuasively calls for a closer consideration of the conceptual underpinnings of the cultural practices around the transformation of ancient Greece and Rome into classics Interpreting Susan Sontag's Essays Mark Fulk, 2021-04-12

 Publishing *Graham Priest on Dialetheism and Paraconsistency* Can Başkent, Thomas Macaulay Ferguson, 2020-01-01 This
 book presents the state of the art in the fields of formal logic pioneered by Graham Priest It includes advanced technical
 work on the model and proof theories of paraconsistent logic in contributions from top scholars in the field Graham Priest's
 research has had a considerable influence on the field of philosophical logic especially with respect to the themes of
 dialetheism the thesis that there exist true but inconsistent sentences and paraconsistency an account of deduction in which
 contradictory premises do not entail the truth of arbitrary sentences Priest's work has regularly challenged researchers to
 reappraise many assumptions about rationality ontology and truth This book collects original research by some of the most
 esteemed scholars working in philosophical logic whose contributions explore and appraise Priest's work on logical
 approaches to problems in philosophy linguistics computation and mathematics They provide fresh analyses critiques and
 applications of Priest's work and attest to its continued relevance and topicality The book also includes Priest's responses to
 the contributors providing a further layer to the development of these themes **Handbook on the Geographies of**
Power Mat Coleman, John Agnew, 2018-07-27 The so called spatial turn in the social sciences means that many researchers
 have become much more interested in what can be called the spatialities of power or the ways in which power as a medium
 for achieving goals is related to where it takes place Most famous authors on the subject such as Machiavelli and Hobbes saw
 power as entirely equivalent to domination exercised by some over others Though this meaning is hardly redundant
 understandings of power have become more multidimensional and nuanced as a result of the spatial turn Much recent
 writing in human geography for example has rigorously extended use of the term power beyond its typical understanding as
 a resource that pools up in some hands and some places to a medium of agency that has different effects depending on how it
 is deployed across space and how actors cooperate or not to give it effect To address this objective the book is organized
 thematically into four sections that cover the main areas in which much of the contemporary work on geographies of power is
 concentrated bodies economy environment and energy and war **Metrical Claims and Poetic Experience** Hannah
 Vandegrift Eldridge, 2022-09-22 This volume contributes to the fields of lyric poetry and poetics especially poetic form
 aesthetics and German literature by intervening in debates on the social functions cognitive and emotional effects and the
 value of poetry It builds on and moves beyond previous theories of rhythm to tie meter more particularly to the specificities
 of poetic language in blending of embodied responses cultural situations and linguistic particularities The book examines the
 German language tradition across three centuries arguing that the interdisciplinarity and richness of metrical theory and

practice emerge in the heterogeneity of poetry and its defenders in their specific historical moments Focusing on Friedrich Gottlieb Klopstock Friedrich Nietzsche and Durs Gr nbein the book contextualizes each in the metrical and aesthetic debates of his epoch showing how questions of meter are linked with overarching poetic goals such as the relationship between form and meaning the adaptation of the Classical past for German literature and the ways poetry s sounds work in the body It argues that Klopstock s Nietzsche s and Gr nbein s metrical theory and practice offer valuable insights for thinking about the ways poetry works and why it matters *Essays in Ecumenical Theology II* Ivana Noble,2022-06-08 In this volume of *Essays in Ecumenical Theology* Ivana Noble engages in conversations with Orthodox theologians and spiritual writers on diverse themes These include the discovery of the human heart what illumination by divine light means the relationship between prayer and attitudes and acts of social solidarity the problematic nature of sacrificial thinking as the way to express redemption through Christ the ecological dimension of theological anthropology the need for freedom to coexist with love for others and why institutions need to turn not only to their own traditions but also to the Spirit that blows where it wills

Rattan,2017-10-02 These are exciting times for philosophical theorizing about propositions with the last 15 years seeing the development of new approaches and the emergence of new theorists Propositions have been invoked to explain thought and cognition the nature and attribution of mental states language and communication and in philosophical treatments of truth necessity and possibility According to Frege and Russell and their followers propositions are structured mind and language independent abstract objects which have essential and intrinsic truth conditions Some recent theorizing doubts whether propositions really exist and if they do asks how we can grasp entertain and know them But most of the doubt concerns whether the abstract approach to propositions can really explain them Are propositions really structured and if so where does their structure come from How does this structure form a unity and does it need to Are the representational and structural properties of propositions really independent of those of thinking and language What does it mean to say that an object occurs in or is a constituent of a proposition The volume takes up these and other questions both as they apply to the abstract object approach and also to the more recently developed approaches While the volume as a whole does not definitively and unequivocally reject the abstract objection approach for the most part the papers explore new critical and constructive directions This book was originally published as a special issue of the Canadian Journal of Philosophy

Jamie Pitts,2025-06-12 Contemporary theologians tend to associate the Holy Spirit with the formation of local communities

social movements and fluid relational networks and not with institutions such as denominations or global church bodies In this work Jamie Pitts argues that this pneumatological sociological picture misses important aspects of the Spirit's work Pitts draws on a wide range of theological and theoretical resources to depict the Spirit as organizing the complex dynamic and relationally entangled structures that constitute creation Human organizing that seeks to participate in the Spirit can take a variety of analogous structural forms including formal organizations or institutions Organizational participation in the Spirit is not a function of an organization's scale mobility or relative informality but rather of its practical orientation toward the Spirit's goals of life solidarity healing and inclusive justice A series of case studies clarifies and extends the implications of the argument in connection to organizing for environmental gender sexual and racial justice In the final chapter Pitts addresses the role of a political theology of the organizing Spirit in imagining organizational alternatives to the global neoliberal order

Legal and Rhetorical Foundations of Economic Globalization Keren Wang, 2019-06-13 This book examines the subtle ways in which rhetorics of sacrifice have been re-appropriated into the workings of the global political economy in the 21st century It presents an in-depth analysis of the ways in which ritual practices are deployed under a diverse set of political and legal contexts as legitimation devices in rendering exploitative structures of the prevailing political economic system to appear inescapable or even palatable To this end this work explores the deeper rhetorical and legal basis of late capitalist governmentality by critically interrogating its mythical and ritual dimensions The analysis gives due consideration to the contemporary incarnations of ritual sacrifice in the transnational neoliberal discourse from those exploitative yet inescapable contractual obligations to calendrical multi-billion dollar offerings to the insatiable needs of too big to fail corporations The first part of the book provides a working interpretative framework for understanding the politics of ritual sacrifice one that not only accommodates multidisciplinary interdisciplinary knowledge of ritual practices but that can also be employed in the integrated analysis of sacrificial rituals as political rhetoric under divergent historical and societal contexts The second conducts a series of case studies that cut across the wide variability of ritual public takings in late capitalism The book concludes by highlighting several key common doctrines of public ritual sacrifice which have been broadly observed in its case studies These common doctrines tend to reflect the rhetorical and legal foundations for public takings under hegemonic market-driven governance They define appropriate and proper occasions for suspending pre-existing legal protections to regularize otherwise transgressive transfers of rights and possessions for the greater good of the economic order
